# Moline

## 1.0 Overview

### 1.1 Introduction

The Lead Service Line Replacement and Notification Act (Act), State of Illinois Public Act 102-0613, went into effect on January 1, 2022. This Act required that every owner or operator of a community water supply (CWS) that has known or suspected lead service lines (LSLs) create a plan to replace each lead and galvanized service line (if connected downstream of lead piping); submit that initial plan to the Illinois Environmental Protection Agency (Agency) by April 15th, 2024; submit by April 15th of each year after 2024 until 2027 an updated lead service line replacement plan to the Agency; and submit by April 15th, 2027 a final lead service line replacement plan to the Agency.

The Act also requires that the plan is posted on the community water supply's website. This Plan will be available on the City's website until April 15, 2025, at which time it will be replaced with an updated Plan.

The City of Moline has prepared an initial Lead Service Line Replacement Plan (Plan) in compliance with the Act and its requirements. The Plan includes the name and identification number of the CWS; an inventory of the total service lines, known and suspected LSLs, and LSLs that have been replaced since 2020; a proposed replacement schedule; a cost analysis with financing options; a prioritization plan; community outreach measures; and workforce development measures.

## 2.0 Background Information

### 2.1 Location

The City of Moline is located on the Iowa-Illinois state border in Rock Island County. The City is bound by Rock Island to the west, East Moline to the east, and Milan to the south. The City corporate boundaries encompass an area of approximately 16.75 square miles.

### 2.2 Community Water Supply (CWS)

The Community Water Supply (CWS) is named Moline and is IEPA Water System No. IL1610450. The CWS serves a population of 44,500 and provides water to 16,943 water customers, to the City of Silvis, and to the Cloverleaf Mobile Home Park.

The CWS takes ownership of the service line extending from the water main to the water shut-off valve or Buffalo Box (b-box)/curb stop while the property owner takes ownership of the service line from the water shut-off valve or Buffalo Box (b-box)/curb stop according to the City's Code of Ordinances, listed in Appendix 1.

## 3.0 Lead Service Line Inventory (LSLI)

### 3.1 Summary

The definitions of water service line materials in the CWS's inventory adheres to the definitions provided by the Illinois EPA. These definitions are outlined in the table below.

Service Line Material
Copper – No Lead Solder (C)
Galvanized Requiring Replacement (GRR)
Lead (L)
Cast/Ductile Iron (O)
Unknown (U)
Unknown Not Lead (UNL)

The CWS has made ongoing efforts to complete its inventory. These efforts include those listed below: reviewing resident surveys, water meter replacement records, a property’s building age, exploratory excavations at targeted locations, visual inspection of interior service lines, and predictive modeling for properties without known material type.

- **Building Age:** For those buildings constructed after 1988, service lines are assumed to be non-lead on both the public and private sides.
- **Historical Records:** Where available, historical records were used to identify service line material. Historical records could include water meter replacement records, water main replacement records, water main tapping cards, water meter cards, permit records, and documentation from maintenance and repairs.
- **Visual Identification:** The CWS staff recorded service line material when entering private property.
- **Exploratory Excavations:** Very few records contain information on the public-side service line material. A contractor excavated in the parkway to determine public-side material at select locations to determine lead density throughout the service area.
- **Predictive Modeling:** Those addresses for which there are no historical records or survey responses to verify the private side of the material and are within the time period in which lead services were installed were included in a machine learning predictive model that correlates service line material to building characteristics. Any addresses that have a greater than 50% chance of having a lead service is considered suspected lead on the inventory spreadsheet.

The current inventory includes:

- The total number of services lines in the CWS for the current year;
- The material composition of each service line in the CWS’s distribution system;
- The count of suspected lead service lines identified since the last inventory submission;
- The number of suspected or known lead service lines replaced since the last inventory submission

A copy of the inventory submitted to the Agency that lists the total number of service line connections, total LSLs, and total suspected LSLs is included in Appendix 2. A map of the building ages in the CWS is included in Appendix 3. Buildings built prior to 1970 have a higher probability of having a lead service.

Service Material	# of Services	
	Private	Public
Lead (L)	2630	1482
Unknown (U)	1133	4648
Galvanized Requiring Replacement (GRR)	1055	91
Not Lead	12375	10972

## 4.0 Funding Considerations

The funding sources for the Lead Service Line Replacement (LSLR) Program will be considered and evaluated in this section. A proposed funding plan to meet the requirement to complete the LSLR within the seventeen (17) year replacement timeframe will be presented.

Based on an inventory of 4,732 LSLs and a replacement cost of \$11,000, the CWS will need \$52,052,000 to fund the LSLR Program. The CWS will likely use a combination of the funding sources described in this section. With a mandated replacement rate of 6%, the CWS will plan to replace 284 LSLs annually at a projected cost of \$3,124,000.

#### 4.1 Federal & State Funding Sources

Other possible funding sources would be periodically evaluated for favorability and affordability. These funding sources could include:

Illinois Environmental Protection Agency (IEPA) State Revolving Fund Loan Program (SRF)

Illinois Department of Commerce and Economic Opportunity (DCEO) Grants

HUD-administered Community Development Block Grant (CDBG)

Congressional Discretionary Funding

United States Environmental Protection Agency (USEPA) Community Change Grants

##### 4.1.1 IEPA State Revolving Fund (SRF)

The Bipartisan Infrastructure Act reserved \$15 billion in funding for LSLR in the United States over five years. To date, the State of Illinois has received \$337.1 million in the first two years of funding. The amount of funding reserved for LSLR in the State of Illinois for the next three years is unknown. This funding is available as low-interest and forgivable loans allocated through the Illinois EPA SRF loan program.

The IEPA SRF loan program awards loans according to census tract scoring that considers demographic information that will be discussed in more detail in the Prioritization section. A preliminary census tract ranking system was developed with available census data and 2023 inventory information. The ranking may change with updates to the census demographic data or with any changes in the number and density of lead services. This ranking system is developed using the best available knowledge and will be updated annually with new information.

For planning purposes, the CWS will assume that it receives forgivable loans for LSLR in census tracts with a combined score higher than 300 and 0% interest loans for LSLR in census tracts with a combined score higher than 250.

Forgivable Loan Census Tract	Score	Rank	LSLs
Census Tract 213, Rock Island County, Illinois	380	22	279
Census Tract 222, Rock Island County, Illinois	280	941	1060

0% Interest Loan Census Tract	Score	Rank	LSLs
Census Tract 214, Rock Island County, Illinois	255	1474	337
Census Tract 217, Rock Island County, Illinois	250	1351	588
Census Tract 221, Rock Island County, Illinois	255	1475	307
Census Tract 223, Rock Island County, Illinois	265	265	329

Current estimates suggest that the SRF loan program could provide forgivable loans for 1339 LSLRs and 0% interest loans for 1561 LSLRs within the CWS, which accounts for 57% of the CWS's LSLRs. The forgivable funding is estimated to be approximately \$14,729,000 while the 0% interest loan funding is estimated to be approximately \$17,171,000.

**4.1.2 Illinois Department of Commerce and Economic Opportunity (DCEO) Grant**

The Office of Community Development supports economic development, community development, and infrastructure improvements in Illinois communities with substantial low-to-moderate-income populations. Various DCEO grants can be used for LSLR funding. The CWS will periodically review available grants.

**4.1.3 HUD Community Development Block (CDB) Grant**

The Office administers the federally funded Community Development Block Grant (CDBG) program that assists low-income populations. LSLR Programs are eligible for CDBG funding in qualifying areas. The CWS will evaluate their eligibility for CDBG funding.

**4.1.4 Congressional Discretionary Funding**

Each member of the United States Congress receives an allotment of grant funding to be used at their discretion annually. While no funding has been awarded and it is unlikely that Congressional Discretionary Funding will be a significant source of funding, this source of funding is still an option to fund a portion of a project.

**4.1.5 United States Environmental Protection Agency (USEPA) Community Change Grants**

The USEPA has recently funded \$2 billion for the Community Change Grants to be used in pollution reduction projects, which would include lead service line replacements. The maximum amount the CWS may receive for lead service line replacements is \$20 million. The below census tracts are eligible for Community Change Grant funding. Those census tracts that are in bold are unlikely to receive IEPA SRF forgivable funding and are the suggested project areas for a Community Change grant award.

Census Tract	LSLs
Census Tract 213, Rock Island County, Illinois	279
<b>Census Tract 217, Rock Island County, Illinois</b>	588
Census Tract 222, Rock Island County, Illinois	1060
<b>Census Tract 223, Rock Island County, Illinois</b>	329

**4.2 Revenue-Generating Funding Sources**

The local and direct revenue generating methods that are evaluated in the Plan are:

- Increased local sales taxes
- Resident cost sharing
- Water rate increase
- Increase of other taxes

The proposed taxes and fees would be continuous revenue sources set at rates to meet the mandated annual LSLR rate.

**4.2.1 Increased Local Sales Tax**

Communities, counties, and sports authorities have imposed a modest sales tax increase over a determined period of time to generate revenue from the constituents that benefit from the proposed improvement.

The City of Moline municipal Sales Tax generated \$21.8 million in FY22. The sales tax rate for retail sales in Moline is:

Illinois	6.25%
Moline	1.00%
Rock Island County	1.25%
	8.50%

Therefore, if the Moline Municipal Sales Tax were increased 0.25%, an additional \$5.45 million (0.25/1 x \$21.8 million) would be available annually for LSLR. If the tax were increased 0.50% then \$10.9 million could be available annually for LSLR. An increase in local sales tax could fund 495 or 990 LSLRs annually, respectively.

While this is possible due to the private side ownership, it is highly unlikely. Moline operates the utility as an enterprise and has not used sales taxes to fund utility operations.

#### 4.2.2 Resident Cost Sharing

Resident cost sharing is another revenue-generating method that shares the cost of replacement with those whose properties are affected. A cost sharing program that includes a \$25/month replacement charge on the water bill for twenty years would generate \$300 per LSLR per annum and \$6,000 over the repayment period. This repayment amount covers the approximate cost of the private side of the replacement while remaining affordable for affected water customers.

The CWS will evaluate this method based on affordability and ease of implementation. This method would require the ability to tie the cost sharing to the property title so that it transfers with any change of property ownership. This method is also more feasible when the intent is to cover annual loan repayments versus the total construction cost for that year.

City staff will recommend to city council that the cost to replace the property owner side be incorporated into rates/fees as other regulatory requirements are funded. The CWS is also considering greater assistance for disadvantaged customers.

#### 4.2.3 Water Rate Increase

The CWS can consider raising rates to fund the LSLR Program. Rates and fees will be evaluated in accordance with the City's financial model. The water fund already has an SRF loan, which retires in 2024, and the City has an ordinance that requires the utility to maintain a balanced budget. The rate increase will be evaluated for affordability and for its ability to fund the Program. A rate increase of 5% would generate an additional \$433,600 annually from the \$8.67 million generated in fees in FY22. The current water rates are included in Appendix 4.

#### 4.2.4 Increase of Other Tax Sources

Besides sales and property taxes, the State of Illinois has about twenty-six other revenue sources as taxes, fees, assessments, license fees, lottery, use fees, transfer tax and user fees ranging from Automobile Renting Occupation and Use Tax to Video Gaming Tax and License Fee. The time to enact a tax in any form to fund the LSLR is prohibitive and the likelihood of enactment is very low, based on existing taxes. Additional revenue from State funding or from Federal sources into a State administered fund is not guaranteed.

### 4.3 Potential Funding

The CWS could use a combination of any of the methods discussed above to generate sufficient funds to cover the replacement costs. However, it is the intent of the CWS to maximize grants and forgivable loan awards to cover LSLR costs.

### 4.4 Financial Plan

The CWS will consider all funding sources listed above. The financial plan, like the other elements of the Plan, is a living document and can change as the availability of funding changes. Currently, the CWS plans to take advantage of the SRF loan program to fund the next four years of replacements.

The CWS will continue to develop a financial plan for future replacements as more information on the inventory, bidding environment, and funding is gathered.

## 5.0 Prioritization

Since the number of LSLs in the system exceeds the number of replacements the CWS can afford in a single year, the LSLR Program must include an element of prioritization. The CWS will follow the mandated replacement rate of 6% or 284 LSLs per

year for 17 years laid out in the Act. The CWS will prioritize replacement project areas based on risk factors and planned companion infrastructure projects.

### 5.1 Risk Factors

The population most at risk of exposure to lead and with the highest health risks when exposed is children and seniors in disadvantaged areas. The IEPA SRF loan program incorporates census data for median household income, children under the age of 6, unemployment rate, poverty rate, social security rate, and supplemental security income to prioritize at-risk populations. The CWS will use the IEPA SRF scoring system to prioritize those areas with the most at-risk populations.

The CWS will also prioritize replacements in high-risk facilities such as daycares, schools, parks, hospitals, and nursing homes.

### 5.2 Prioritization Factors by Vermont Department of Environmental Conservation

When the service area of the CWS with the same level of risk contains more lead services than can be replaced in a year, the CWS will consider companion infrastructure projects such as water main replacements, water meter replacements, and road resurfacing projects when prioritizing each year's project area.

The Vermont Department of Environmental Conservation developed a prioritization rubric as a standard and transparent method for determining replacement order according to the factors discussed. The table below lists the prioritization factors and priority points as recommended by the Vermont Department of Environmental Conservation and then the priority points developed by the CWS to account for the Illinois-specific requirements of the Act and IEPA SRF-funding.

As each LSL is identified and categorized with any possible number of the prioritization factors listed below, the summation of the factors yields a prioritization points Score using the rubric, as a guide to scoring based on the criteria, as shown below.

Priority Points – Vermont Department of Environmental Conservation	CWS /REL Priority Points	Prioritization Factor	LCRR Requirement
10	8	Known Lead Service Line	Required
10	80	Populations Most Sensitive to the Effects of Lead <ul style="list-style-type: none"> <li>• Schools and Day Care Facilities</li> <li>• Homes with children and/or adults who are pregnant or may become pregnant</li> </ul>	Required
10	10	Disadvantaged Communities	Required
8	8	Known GRR Service Line	Required
5	2	Populations Most Sensitive to the Effects of Lead <ul style="list-style-type: none"> <li>• Nursing Homes</li> <li>• Medical Facilities</li> </ul>	Not Required
5	8	Companion Projects (concurrent infrastructure projects)	Not Required
5	8	Compact Projects (concurrent project in the same area)	Not Required
3	8	Long Length Lead Pipe Projects (or high lead results)	Not Required

2	6	Other Factors Listed in ANSI/AWWA C810-17 § II.A. <ul style="list-style-type: none"> <li>• Service lines physically disturbed by digging, excavation, repair, or other activities</li> <li>• Existing partial lead service line replacements</li> <li>• Consideration of presence of lead goosenecks or pigtails</li> </ul>	Not Required
N/A	20	Funding Eligibility	Not Required
N/A	5	LSL Density	Not Required
1	5	Other Factors Significant to the Water System	Not Required

### 5.3 Emergency Work-related Lead Service Line Replacement (EW-LSLR)

LSLR instances arising from emergency repairs often require an on-call contractor to complete the work of drilling a service line into a private building. The IL LSLR&N Act states that the CWS must provide the option of replacing a property owner’s service line if the property owner requests the full replacement. The CWS is not required to fund the full replacement. Funding terms will be discussed at the time of the work.

The City shall consider developing an on call contractor pool through a qualifications process that can bid on individual project’s emergency work.

## 6.0 Lead Service Line Replacement (LSLR)

### 6.1 Scope of LSLR

The work shall consist of the removal and replacement of lead or galvanized iron water services for buildings within the specified service area. The area will be determined based on prioritization, material, building age, and funding limits, but all will be within the corporate boundaries of the CWS. New copper service lines shall be installed for full and partial lead service line replacement. Full lead service line replacement shall be defined as connecting from the water main to inside the building. Partial service line replacement shall be defined as connecting from the curb box (B-box or buffalo box) to the water main. No lead piping will be left in the water system. Partial replacements will only occur where the existing service is partially lead or galvanized. Cross-sectional replacement details are included in Appendix 5.

Replacements will begin in Census Tracts 213 and 222. These replacements are expected to last four years at the mandated replacement rate but will depend on the maximum amount of annual IEPA SRF funding received.

### 6.2 Replacement Methods

The methods of installing the new service are described below. To minimize impacts to residential property and to reduce restoration, trenchless methods are preferred.

**Open cut:** Open cut trenching is the typical method used by plumbers, especially for properties slated for demolition and replacement. It involves digging a trench, which can cause significant exterior disruption to property owners. Interior disturbances depend on whether the basement is finished. Despite its disturbance, open cut trenching is often the most cost-effective option, particularly when restoration costs are minimal. This approach is advised based on individual circumstances.

**Trenchless:** Trenchless installation of water services is being explored to address concerns such as economic impact, landscape disruption, and social inconveniences associated with traditional open cut methods. Advances in trenchless technologies offer a more efficient alternative in certain situations, minimizing surface disruption and restoration time. These methods are socially appealing as they cause less destruction and require less restoration compared to open cut techniques.

Standard Horizontal Directional Drilling: Standard Horizontal Directional Drilling (HDD) involves using a drill rig on the ground surface to create a tunnel underground. To reach a depth of about 5'6" below the ground surface, the drill rig head must be positioned approximately 30 feet away from the final depth point of the water service. This may require closing the road for safety. While many pipeline and cable contractors employ this method, plumbing contractors often subcontract it out as specialty work.

Pipe pulling: Pipe pulling is the most cost-effective method among trenchless options for installing water services. It involves using the path of the existing pipe, eliminating the need for additional excavation. A new water service pipe is pulled along the existing route, often with a winch or excavator bucket with a cable. The new copper service is connected to the existing lead service in the home, effectively replacing it using the borehole left by the removed lead pipe.

The connection to the water main typically incorporates the use of a tapping sleeve and is done by a licensed plumber. The licensed plumber also connects the new service line to the existing water meter inside the house according to the State of Illinois plumbing code.

Prior to completion of the work, the Contractor shall provide each address that received a new service line with a Point of Use water filter that meets both NSF/ANSI 42 and 53 certifications for lead reduction with a minimum capacity of 0.5 gallons and six months of replacement cartridges or a minimum of 150 gallons of filtration capacity. The filter shall not be a permanent faucet filter. The Contractor shall have the resident provide a signature to acknowledge receipt of the filter on a form provided by the City. The form shall be turned in with other documentation.

Prior to beginning the work of connecting the new service inside the house, the water supply to the service line and the property owner shall be shut off to avoid release of particulate lead into the property owner's premises. After all connections have been completed, the Contractor shall flush the water from an outside connection (such as a hose bibb or hose leading from the building side of the meter) to remove any particles in the service line. Flush at full velocity for at least 30 minutes. The Contractor shall then advise the property owner to flush the interior premise plumbing in accordance with the instructions provided in the Owner-provided informational material. This work shall be conducted in accordance with AWWA C810-17 – Replacement and Flushing of Lead Service Lines.

The City will use these standards when performing lead service line replacement:

Item	Condition
1. Restoration of Interior and Exterior	Meet existing condition or better
2. Parkway/Yard Restoration	Sod, Seed in Summer
3. Field Locate B-boxes	Location by City
4. Trench backfill	CA-6
5. Verify B-box operation at Project Completion – after surface restoration	B-boxes keyed by City
6. Street Cross Sections	Minimum 6-inch pavement patching
7. Work Hours	Monday to Friday 7 am to 7 pm Saturday 8 am to 7 pm No Work Sunday or Holidays, except Contractor my Schedule meeting/inspection at buildings on Sunday.
8. Meter Pits	City will be consulted prior to relocating meter to building interior and abandoning the meter pit. Contingency Pay Item for this work included in contract.

9. B-box	Mueller H-10302, Minneapolis Pattern or approved equal
10. Curb stop	Mueller Ball Style: 300# or approved equal
11. Corp Stop	Mueller 300# or approved equal
12. Abandon existing Lead Service Line	Close corp stop; remove lead service from main; remove corp and reuse direct tap by placing tapping sleeve and peen end of lead service. Use abandoned corporation fitting for winter time.

### 6.3 Completed LSLR

The CWS completed a lead service line replacement project in 2021, replacing 34 LSLs.

## 7.0 Workforce Development

In performing projects associated with the Lead Service Line Replacement initiative, the CWS plans to develop the workforce available to perform these projects. These developmental practices include:

- Smaller bids: The CWS will break the required replacements into smaller projects within the CWS, so that the bids will be smaller and more attainable for smaller firms.
- College engagement: The CWS will engage with local colleges and institutions to train new individuals entering the workforce.
- Hiring local: The CWS will include a clause within the scope of work for interior work and inspections to be conducted by local contractors who have an understanding of the community.
- Experience contractor teaching: An experienced contractor teaches a smaller contractor how to perform the work.

Diversity in hiring practices are another aspect to workforce development and would include contacting all local MBE and WBE contractor associations during bidding.

The Contractor shall also take the following specific affirmative action to ensure equal employment opportunity:

- Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the Contractor's employees are assigned to work. The Contractor, where possible, will assign two or more women to each construction project. The Contractor shall specifically ensure that all foremen, superintendents, and other on-site supervisory personnel are aware of and carry out the Contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.
- Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the Contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.
- Maintain a current file of the names, addresses and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the Contractor by the union or, if referred, not employed by the Contractor, this shall be documented in the file with the reason; therefore, along with whatever additional actions the Contractor may have taken.
- Provide immediate written notification to the Director when the union or unions with which the Contractor has a collective bargaining agreement has not referred to the Contractor a minority person or woman sent by the Contractor, or when the Contractor has other information that the union referral process has impeded the Contractor's efforts to meet its obligations.

- Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the Contractor's employment needs, especially those programs funded or approved by the Department of Labor.
- Disseminate the Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.
- Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions including specific review of these items with onsite supervisory personnel such as Superintendents, General Foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.
- Disseminate the Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the Contractor's EEO policy with other Contractors and Subcontractors with whom the Contractor does or anticipates doing business.
- Direct its recruitment efforts, both oral and written, to minority, female and community organizations, to schools with minority and female students and to minority and female recruitment and training organizations serving the Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the Contractor shall send written notification to organizations such as the above, describing the openings, screening procedures, and tests to be used in the selection process.
- Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer and vacation employment to minority and female youth both on the site and in other areas of a contractor's work force.
- Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR Part 60-3.
- Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.
- Ensure that seniority practices, job classifications, work assignments and other personnel practices, do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the Contractor's obligations under these specifications are being carried out.
- Ensure that all facilities and company activities are non-segregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.
- Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.
- Conduct a review, at least annually, of all supervisors' adherence to and performance under the Contractor's EEO policies and affirmative action obligations.

## 8.0 Resident Communication and Outreach

To ensure effective community engagement, the CWS's outreach program for the Lead Service Line Replacement (LSLR) initiative will employ various communication methods aimed at informing and involving homeowners. Central to the program's success is consistent and informative communication across multiple platforms, including meetings, press releases, door-to-door notifications, and social media channels. By leveraging these diverse communication channels, the program aims to raise

widespread awareness about the significance of the LSLR program and the options available for homeowners to participate. Early successes of the program will be shared with the community to foster positive feedback and encourage support for the initiative.

To effectively communicate the goals and requirements of the LSLR program, a comprehensive outreach & communication plan is developed, outlining key messaging, target audiences, and preferred communication methods. Emphasis will be placed on building trust and transparency with homeowners, ensuring they understand the benefits of participating in the program. Notices will be sent to homeowners at least 45 days before the commencement of work, with repeated notifications every two weeks until confirmation of receipt. Special attention will be given to non-English speakers, providing translated notices and instructions for accessing additional resources. As previously mentioned, the Community Outreach and Public Engagement plan will be vast, consistent, and includes:

**Stakeholder Identification:** The CWS has Identified key stakeholders, including residents, local businesses, community organizations, schools, healthcare providers, and governmental agencies.

**Educational Materials:** The CWS is developing comprehensive educational materials explaining the importance of lead service line replacement, potential health risks associated with lead exposure, details of the replacement process, and available resources for assistance. The materials currently developed and used for LSLR outreach are added in Appendix 6.

**Multi-Channel Communication:** The CWS plans to utilize a variety of communication channels to reach different segments of the community, including:

- Printed materials such as program brochures, flyers, door hangers and direct mail distributed to households, businesses, and public spaces.

- Digital platforms including the village website, email newsletters, and community forums.

- Information sessions and workshops held at community centers, schools, and other public venues.

- Door-to-door outreach by trained community volunteers or outreach workers to engage directly with residents.

**Social Media Channels:** The CWS intends to utilize its social media platforms to engage with residents regarding lead exposure concerns. Posts will include links to informative resources on the CWS's website, as well as videos and webinars explaining lead risks and the CWS's efforts to mitigate them. Social media will also be used to announce upcoming project activities, public outreach events, and success metrics such as the percentage of lead pipes replaced.

**Language and Accessibility:** The CWS will ensure that all materials and communication efforts are available in multiple languages to accommodate the linguistic diversity of the community. Additionally, make information accessible to individuals with disabilities by providing alternative formats such as large print or audio versions.

**Personalized Outreach:** The CWS will tailor outreach efforts to specific demographics or neighborhoods within the service area, taking into account factors such as income level, age, cultural background, and housing status. Engage community leaders and influencers to help disseminate information and encourage participation.

**Community Workshops and Events:** The CWS has plans to organize community workshops, town hall meetings, and informational events where residents can learn more about the lead service line replacement program, ask questions, and provide feedback. Offer opportunities for hands-on demonstrations or tours of the replacement process and an avenue for public comment on the LSLR plans.

**One-on-One Assistance:** The CWS intends to provide personalized assistance and support to residents who may have questions or concerns about the replacement program. Establish a dedicated hotline or helpline staffed by knowledgeable personnel to address inquiries and provide guidance.

**Feedback Mechanisms:** The CWS plans to implement feedback mechanisms such as surveys, focus groups, or public hearings to gather input from residents throughout the planning and implementation phases of the program. Use this feedback to adjust and improvements as needed.

**Collaboration and Partnerships:** The CWS plans to collaborate with local organizations, community groups, schools, healthcare providers, and government agencies to amplify outreach efforts and leverage existing networks and resources.

**Ongoing Engagement:** The CWS will maintain ongoing communication and engagement with the community beyond the initial outreach phase. Provide regular updates on the progress of the replacement program, share success stories, and continue to address any concerns or issues that arise.

**Non-Participation/Waivers:** Homeowners in the CWS may not always be ready to engage with or communicate regarding the LSLR program. At present, the CWS lacks the authority to mandate homeowner access to private property or demand access for replacing the private side of the LSL. For those who choose not to participate, an Illinois Department of Public Health waiver form will be available. Efforts to communicate will be recorded for unresponsive homeowners. Nevertheless, these households will still receive complimentary point-of-use filters along with six replacement cartridges.

## Appendix 1

### Code of Ordinances

Council Bill/Resolution No. 3021-2022

Sponsor: \_\_\_\_\_

AN ORDINANCE

AMENDING Chapter 34, "WATER and SEWERS," of the Moline Code of Ordinances, Section 34-1100, "GROUNDS FOR TERMINATION," Section 34-2103 "SERVICE TAPS," Section 34-2121, "CHARGES AND COLLECTIONS," Section 34-2126, "DEPOSIT FOR TEST OF METER," Section 34-3402, "PRETREATMENT OF WASTEWATER," Section 34-3403, "ENVIRONMENTAL REMEDIATION WASTEWATERS," and Section 34-3414, "PRETREATMENT CHARGES AND FEES," by repealing said sections in their entirety and enacting in lieu thereof new Sections 34-1100, 34-2103, 34-2121, 34-2126, 34-3402, 34-3403 and 34-3414 dealing with the same subject matter.

\_\_\_\_\_

WHEREAS, staff has reviewed various fees related to utility service and a number of fees were recommended to be adjusted to allow the true cost of service to be charged; and

WHEREAS, fees in question relate to service provided to specific customers; and

WHEREAS, the best industry practice is to charge only those customers receiving specific services, rather than having the entire customer base subsidize specific activities; and

WHEREAS, staff recommends amendments to Chapter 34 of the Code of Ordinances pursuant to direction provided by City Council during the fee review roundtable meeting held on August 16, 2022; and

WHEREAS, said fees will be effective January 1, 2023.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF MOLINE, ILLINOIS, as follows:

That Chapter 34, "WATER and SEWERS", of the Moline Code of Ordinances, Section 34-1100, "GROUNDS FOR TERMINATION", Section 34-2103 "SERVICE TAPS", Section 34-2121 "CHARGES AND COLLECTIONS", Section 34-2126 "DEPOSIT FOR TEST OF METER", Section 34-3402 "PRETREATMENT OF WASTEWATER", Section 34-3403 "ENVIRONMENTAL REMEDIATION WASTEWATERS", and Section 34-3414 "PRETREATMENT CHARGES AND FEES", is hereby amended by repealing said sections in their entirety and enacting in lieu thereof new Sections 34-1100, 34-2103, 34-2121, 34-2126, 34-3402, 34-3403 and 34-3414 dealing with the same subject matter; provided, however, that said contract is in substantially similar form and content to that attached hereto and incorporated herein by this reference thereto as Exhibit A.

**Chapter 34 Fee adjustments: Redlined version for council consideration.**

**SEC. 34-1100. GROUNDS FOR TERMINATION.**

Wherever in Chapter 34 of the Code of Ordinances involuntary termination of services is provided for, the procedures of Article I shall apply.

(1) All water, sewerage and stormwater drainage bills not paid within twenty (20) days after date of statement shall receive a pre-termination notice demanding payment within five (5) days, unless the fifth (5th) day falls on a Saturday, Sunday, or legal holiday, then payment may be made on the next business day. If payment is not made on the required day, the Public Works Department may terminate water and sewerage service, except as hereinafter provided. A forty-eight (48) hour turn off notice is posted on seriously delinquent water/sewer accounts. An administrative fee of twenty-five dollars (\$25.00) will be charged for staff time preparing and posting this notice. When service is terminated under this section, a ~~forty-five~~ ~~forty-five~~ ~~dollar~~ (~~\$45.00~~~~55.00~~) charge will be made for turning off water service. When service is reinstated, a ~~thirty-five~~ ~~forty~~ ~~dollar~~ (~~\$35.00~~~~40.00~~) charge will be made for turning water service back on. Bills due for water, sewerage and stormwater drainage shall be cumulative and may not be parsed or separated out in any manner. Failure to pay any portion thereof shall be treated as failure to pay under this chapter.

(2) Said five- (5-) day notice shall enumerate the administrative procedure for hearing in the event the amount of the bill is disputed.

(3) If the amount of the bill is disputed, the customer shall state the dispute in writing and shall submit said statement and payment of any undisputed portion of the bill prior to expiration of notice.

(4) The administrative hearing procedure shall occur prior to termination except as hereinafter provided.

(Ord. No. 3017-2006; Sec. 34-1100(1) repealed; new Sec. 34-1100(1) enacted; 04/04/06)

(Ord. No. 3023-2017; Sec. 34-1100(1) repealed; new Sec. 34-1100(1) enacted; 10/10/17)

**SEC. 34-2103. SERVICE TAPS.**

(a) No tap smaller than one (1) inch size shall be allowed or permitted.

(b) In the event that a property owner requests that the City install a small diameter service tap that is two (2) inches or smaller in size, the property owner shall pay a fee of ~~one hundred~~ ~~ten~~ ~~one hundred thirty~~ dollars (~~\$110.00~~~~130.00~~) for City labor and equipment. The property owner is responsible for all other costs associated with the tap, such as but not limited to, materials, excavation, backfill and paving restoration.

(c) In the event that a property owner requests that the City install a large diameter service tap that is greater than two (2) inches but twelve (12) or less inches in size, the property owner shall pay a fee of ~~three hundred twenty-five~~ ~~three hundred sixty~~ dollars (~~\$325.00~~~~360.00~~) for City labor and equipment. The property owner is responsible for all other costs associated with the tap, such as but not limited to, materials, excavation, backfill and paving restoration.

(Ord. No. 3027-2008; Sec. 34-2103 repealed; new Sec. 34-2103 enacted; 03/25/08; Ord. No. 3020-2010; Sec. 34-2103(c ) repealed; new Sec. 34-2103(c ) enacted; 04/13/10)

**SEC. 34-2121. CHARGES AND COLLECTIONS.**

(a) Quarterly charges for water supply by meter. The quarterly charges for water supply by meter shall be:

(1) The schedule of charges effective for all bills issued after January 1, 2012 to December 31, 2012, shall be:

Base Rate - \$5.22 per quarter/bill

Commodity Rate -\$4.08 per thousand gallons

Quarterly Capacity Charge \$25.36 for 5/8-inch meters  
\$38.04 for 3/4-inch meters  
\$63.40 for 1-inch meters  
\$126.80 for 1 ½-inch meters  
\$202.88 for 2-inch meters  
\$380.40 for 3-inch meters  
\$634.00 for 4-inch meters  
\$1,268.00 for 6-inch meters

(2) The schedule of charges effective for all bills issued after January 1, 2013 to December 31, 2013 shall be:

Base Rate - \$5.72 per quarter/bill

Commodity Rate -\$4.46 per thousand gallons

Quarterly Capacity Charge \$27.77 for 5/8-inch meters  
\$41.65 for 3/4-inch meters  
\$69.42 for 1-inch meters  
\$138.85 for 1 ½-inch meters  
\$222.15 for 2-inch meters  
\$416.54 for 3-inch meters  
\$694.23 for 4-inch meters  
\$1,388.46 for 6-inch meters

(3) The schedule of charges effective for all bills issued after January 1, 2014, until modified by Council, shall be:

Base Rate - \$6.26 per quarter/bill

Commodity Rate -\$4.89 per thousand gallons

Quarterly Capacity Charge \$30.41 for 5/8-inch meters  
\$45.61 for 3/4-inch meters  
\$76.02 for 1-inch meters  
\$152.04 for 1 ½-inch meters  
\$243.26 for 2-inch meters  
\$456.11 for 3-inch meters  
\$760.18 for 4-inch meters  
\$1,520.36 for 6-inch meters

The per meter rates for service outside the City limits, but connected to the City-owned water system, shall be two hundred per cent (200%) of the above schedule of charges; however, the percentage applied to out-of-city service shall not apply to water service furnished to another governmental unit pursuant to a contract. Charges for service to such governmental unit shall be determined pursuant to the terms of said contract.

The minimum rate shall be charged as long as the meter remains in service. Upon a written request by the owner or authorized agent asking that the water be shut off and the meter removed, the department shall proceed to comply with such request and the minimum rate shall cease on the date when the meter is removed. Charges as determined in accordance with subsection 34-2121(f) will be made when the meter is removed and when the meter is again installed.

Upon written request of an owner or owner's authorized agent, asking that the public works department change meters from time to time because the owner's seasonal demands for water fluctuate, the department shall comply with such request, provided that the proper plumbing connections are in place and that a fee, as determined in accordance with subsection 34-2121(f), is paid for each requested meter change.

(b) Landscape meters. Those meters designated for measuring water for landscape use, which have been installed to avoid sewer charges, shall be charged actual gallons used as rounded to the nearest one thousand (1,000) gallons with the charge computed in accordance with Sec. 34-2121(a).

(c) Fire sprinkler service connections. All property owners using fire sprinkler service connections to the City's public water supply system shall pay an annual fee based on the size of the fire sprinkler service connection, in accordance with the following fee schedule:

Annual Fee

Size & Type of Connection

2012

2013

2014, and until modified by City Council

2-inch or less Sprinkler

\$80.74  
\$108.65  
\$146.21  
3-inch Sprinkler  
\$114.38  
\$153.92  
\$207.13  
4-inch sprinkler  
\$201.85  
\$271.63  
\$365.53  
6-inch Sprinkler  
\$336.42  
\$452.72  
\$609.22  
8-inch Sprinkler  
\$605.56  
\$814.90  
\$1,096.60  
10-inch Sprinkler  
\$874.70  
\$1,177.07  
\$1,585.97  
12-inch Sprinkler  
\$1,682.11  
\$2,263.60  
\$3,046.10  
16-inch Sprinkler  
NA  
\$4,640.05  
\$6,240.57

This fee shall be billed in four (4) equal quarterly installments, in addition to all other charges for water used elsewhere on the premises.

(d) Fire Hydrants on Private Property. All property owners who have or shall cause to be placed a fire hydrant on their own property for the purpose of fire protection thereof shall pay an annual fee for the same in accordance with the following fee schedule:

Annual Fee

Private Hydrant Charges

2012

2013

2014, and until modified by City Council

\$336.42

\$452.72

\$609.22

This fee shall be billed in four (4) equal quarterly installments, in addition to all other charges for water supply and service to the premises.

(e) New Services. All new services shall pay a fee of ~~ninety-one hundred~~ dollars (~~\$90.00~~100.00) per meter, plus the cost of the meter, with ownership of the meter retained by the City, said charge to be paid upon any of the following, and pursuant to the terms set forth herein:

- (1) Original meter installation;
- (2) Reinstallation of any meter;
- (3) Placement of additional meters on any existing service to provide individual metering in multi-family units or for separating water and sewer charges;
- (4) The setting fee may be waived for a general contractor; the property owner would then pay the setting fee upon transfer of service from the general contractor. Service may be shut off if terminated by the general contractor.

(f) Service Charge.

(1) For transfer of billing, when the service has not been terminated, the charge will be twenty-five dollars (\$25.00); however, in the case where the public works or accounts and finance departments are aware that a new occupant exists and the provisions of Section 34-2119 have not been met, an administrative fee of twenty-five dollars (\$25.00) will be charged for staff time preparing and posting notice to property. A turn-on fee of ~~thirty-five~~ forty dollars (~~\$35.00~~40.00) shall be assessed for turning on water during business hours for existing customers. A fee of ~~fifty-fifty-five~~ dollars (~~\$50.00~~55.00) shall be assessed for turning on water when a meter is also installed or reinstalled. A turn-off fee with meter removal during business hours will be charged ~~fifty-fifty-five~~ dollars (~~\$50.00~~55.00). Overtime charges shall be charged to the customer and shall apply to work performed in transferring the billing outside of regular business hours.

(2) Overtime charges in the minimum amount of ~~eighty-five~~ one hundred-five dollars (~~\$85.00~~105.00) for each occurrence shall be charged to turn on a water service outside of the normal business hours of the accounts and finance office.

(3) A service charge of twenty-five dollars (\$25.00) shall be charged to collect a meter reading and prepare an interim bill at a time that does not coincide with the routine meter reading cycle.

(4) When routine readings are requested for meters which are not used for City billing (sub-meters), the owner shall purchase and be responsible for each meter. Meter repairs shall be performed by public works personnel. Actual repair costs shall be billed to the owner's utility

account. A \$450.00 (four hundred fifty dollar) one-time route set-up fee shall be charged to the owner at the time meters are purchased. Recurring fees shall be billed as follows:

On-Cycle Readings

Reading Quantity

Fee

<10 meters

\$10.00

>10 meters

\$20.00

Off-Cycle Readings

<10 meters

\$20.00

>10 meters

\$30.00

(g) Coliform test charges. A fee of ~~fifteen-twenty-five~~ dollars (~~\$15.00~~~~25.00~~) shall be charged for each coliform test that is performed by the City for construction contractors, private individuals and other non-City entities.

(h) Collection of Service Charges.

(1) In the case only water or only sewer service is provided, to the fund providing the service;

(2) When both water and sewer service is provided, fifty-five percent (55%) to the water fund and forty-five percent (45%) to the water pollution control fund.

(3) When overtime charges are collected and if the water field representative did the turn-on and installation of meter, then the percentages of above apply; and otherwise, all to the water fund.

(i) Prorated Utility Billing. Whenever a utility bill is issued for a period of time less than a full quarterly billing cycle, the following fixed utility bill charges shall be prorated based on the number of actual service days: water capacity charge; sewer fixed charge; solid waste and recycling fee; and quarterly stormwater utility service charge.

(j) Use Charge Exemption for Red Water: Effective for all bills issued after January 1, 2020, and for so long as a water customer is affected by water discoloration due to iron concentration levels in excess of the Illinois Primary Drinking Water Maximum Contaminant Level, said affected customer shall be exempt from the City's commodity charge. Said customers shall pay all other fees and charges for water service.

(1) The exemption shall apply to the commodity charge that would have otherwise been due for the water consumed as measured by the water meter on the premises.

(2) The determination of whether the iron concentration level is in excess of the Illinois Primary Drinking Water Maximum Contaminant Level shall be made as follows: City public works department staff shall collect a sample of water at a tap within the premises, and said

sample shall be analyzed by certified staff at the City's public works facility to determine the iron concentration level.

(3) The exemption shall cease with the first billing issued after two (2) consecutive tests, conducted no less than two (2) weeks apart, in which the iron concentration level is at or below the Illinois Primary Drinking Water Maximum Contaminant Level.

Sec. 34-2121 Amendments:

#### SEC. 34-2126. DEPOSIT FOR TEST OF METER.

Before making a test of any meter the person requesting such test shall, at the time of making application for test, make a deposit at the accounts and finance office of the amount charged for such test, subject to the conditions herein stated, which charges are fixed as follows:

Meter Size Fee Structure

Meter Size Fee Structure

5/8"	<del>\$132.50</del> <u>140.00</u>
3/4"	<del>\$132.50</del> <u>140.00</u>
1"	<del>\$132.50</del> <u>140.00</u>
1-1/2"	<del>\$212.00</del> <u>230.00</u>
2"	<del>\$212.00</del> <u>230.00</u>

4"	<del>\$305.00</del> <u>330.00</u>
6"	<del>\$305.00</del> <u>330.00</u>

No meter shall be removed or in any way disturbed, nor the seal broken, except in the presence of, or under the direction of, the director or said director's authorized agent. If meter test is positive, the fee will be waived.

(Ord. No. 3072-2004; Sec. 34-3126 repealed; new Sec 34-3126 enacted; 09/14/04; Ord. No. 3017-2006; Sec. 34-2126 repealed; new Sec. 34-2126 enacted; 04/04/06)

SEC. 34-3402. PRETREATMENT OF WASTEWATER.

(a) Pretreatment Facilities. Users shall provide wastewater treatment as necessary to comply with this ordinance and shall achieve compliance with all categorical pretreatment standards, local limits, and the prohibitions set out in Section 34-3401 of this ordinance within the time limitations specified by USEPA, the state, or the director of public works, whichever is more stringent. Any facilities necessary for compliance shall be provided, operated, and maintained at the user's expense. Detailed plans describing such facilities and operating procedures shall be submitted to the director of public works and the IEPA for review, and shall be acceptable to the director of public works and IEPA before such facilities are constructed. The review of such plans and operating procedures shall in no way relieve the user from the responsibility of modifying such facilities as necessary to produce a discharge acceptable to the City, and the state under the provisions of this ordinance.

(b) Additional Pretreatment Measures:

(1) Whenever deemed necessary, the director of public works may require users to restrict their discharge during peak flow periods, designate that certain wastewater be discharged only into specific sewers, relocate and/or consolidate points of discharge, separate sewage waste streams from industrial waste streams, and such other conditions as may be necessary to protect the POTW and determine the user's compliance with the requirements of this ordinance.

(2) The director of public works may require any person discharging into the POTW to install and maintain, on their property and at their expense, a suitable storage and flow-control facility to ensure equalization of flow. An Individual Discharge Permit may be issued solely for flow equalization.

(3) Grease, oil, and sand interceptors shall be provided when, in the opinion of the director of public works, they are necessary for the proper handling of wastewater containing excessive amounts of grease and oil, or sand; except that such interceptors shall not be required for residential users. All interception units shall be of type and capacity approved by the director of public works and shall be so located to be easily accessible for cleaning and inspection. Such interceptors shall be inspected, cleaned, and repaired regularly, as needed, by the user at their expense.

(4) Users with the potential to discharge flammable substances may be required to install and maintain an approved combustible gas detection meter.

(c) Accidental Discharge/Slug Control Plans. The City shall evaluate all SIUs for the need of a slug control plan within a year of becoming an SIU. The City shall also evaluate an industrial user's need for slug control plans on an appropriate frequency and consider applicable and relevant control measures for industrial user compliance. The director of public works may require any user to develop, submit for approval, and implement such a plan. Alternatively, the director of public works may develop such a plan for any user. An accidental discharge/slug control plan shall address, at a minimum, the following:

- (1) Description of discharge practices, including nonroutine batch discharges;
- (2) Description of stored chemicals;
- (3) Procedures for immediately notifying the water pollution control division of any accidental or slug discharge, as required by Section 34-3406 (f) (1-3) of this ordinance; and
- (4) Procedures to prevent adverse impact from any accidental or slug discharge. Such procedures include, but are not limited to, inspection and maintenance of storage areas, handling and transfer of materials, loading and unloading operations, control of plant site runoff, worker training, building of containment structures or equipment, measures for containing toxic organic pollutants, including solvents, and/or measures and equipment for emergency response.

(d) Hauled Wastewater.

(1) General Requirements. Industrial, landfill leachate, thin stillage corn syrup, septic tank, grease waste or any other wastewater hauled by truck or trailer may be introduced into the POTW only at locations and at such times as are established by the public works director ("director") or his designee. Any person, firm or corporation desiring to haul said waste to the City of Moline Wastewater Treatment Plant shall obtain a Waste Hauler Permit by registering annually with the director. Said director may prohibit or restrict, and has the right to refuse, the disposal of any or all hauled wastes. No load shall be discharged without prior consent of the director and samples may be collected from each hauled load to ensure compliance with applicable standards. Said waste shall not violate Section 34-3401 of this ordinance or any other requirements or provisions established by the City or the IEPA. Grease trap waste shall be exempt from the requirements set forth in Sec. 34-3401(a)(3)(q). The Waste Hauler Permit does not act as a general control mechanism, rather an additional permit that operates in conjunction with each user's Individual Discharge Permit (described in Section 34-3405 of this ordinance).

(2) Permit Requirements.

a. Grease Trap and Septic Waste Haulers. A Waste Hauler Permit fee of ~~fifty one hundred~~ dollars (~~\$50,00100.00~~) shall be required annually for each type of waste disposal and be valid for a one-year period commencing on January 1.

b. Industrial Waste, Landfill Leachate, Thin Stillage Corn Syrup Waste.

Generators. The director shall require generators to obtain the Individual Discharge Permit and submit a Supplemental (Baseline Monitoring) Report. If the generator is also the hauler, the generator shall be required to obtain a Waste Hauler Permit (fee exempt).

Haulers. The director may require contract haulers (not generator owned) to obtain an Individual Discharge Permit and submit a Supplemental (Baseline Monitoring) Report, in addition to the required Waste Hauler Permit.

c. Permit Registration. Permit registration shall consist of providing the legal business name of the person, firm or corporation; the address and telephone number of the business; the names of representatives, officers, or employees authorized to haul waste in the business name; vehicle identification; disposal site; known or suspected waste constituents, and whether any wastes are RCRA hazardous wastes.

d. Insurance Requirements. Proof of liability insurance acceptable to the office of the director in the type and amount listed below:

Each applicant desiring to haul grease, septic tank, leachate, or thin stillage corn syrup waste to the City of Moline Wastewater Treatment Plant shall obtain and maintain for the duration of such permit registration, public liability and property damage insurance in the minimum amount and form as hereby specified: \$100,000.00 for each occurrence of property damage; and \$300,000.00 for each occurrence of personal injury or bodily harm. Such policy shall provide that it cannot be cancelled except upon written notification to the director at least thirty (30) days prior to the date of cancellation. Proof shall be a certificate of insurance; and

Proof that the applicant has obtained workers' compensation insurance or that the applicant is an approved self-insurer of workers' compensation. Proof shall be either the certificate of insurance from the insurance provider or the certificate of approval as a self-insurer issued by the Illinois Industrial Commission. If an applicant is a sole proprietorship or partnership and the applicant has no employees, the applicant shall not be required to provide proof of workers' compensation insurance. Such applicant's application shall include a sworn statement that said applicant has no employees.

(3) Receiving Fees. Waste hauler receiving fees for grease trap, septic, and industrial waste shall be based on the tank capacity of container per load. See 34-3414 for fees.

(4) Administrative Penalties.

a. Multiple violations of the Waste Hauler Permit, as defined in this section, may warrant administrative penalties, revocation of permit, and termination of discharge privileges to the Moline Wastewater Treatment Plant.

b. When the director finds that a user has violated, or continues to violate, any provision of this ordinance for a waste hauler permit, or any other pretreatment standard or requirement, the director may assess an administrative penalty to such user in an amount of at least one thousand dollars (\$1,000.00). Such penalties shall be assessed on a per violation, per day basis.

c. A lien against the user's property will be sought for unpaid charges, fines, and penalties.

d. Users desiring to dispute such penalties must file a written request to the director for reconsideration along with full payment of the fine amount within thirty (30) days of being notified of the penalty. Where a request has merit, the director may convene a hearing on the matter. In the event the user's appeal is successful, the payment shall be returned to the user. The director may add the costs of preparing administrative enforcement actions, such as notices and orders, to the penalty.

e. Issuance of an administrative penalty shall not be a bar against, or a prerequisite for, taking any other action against the user.

(Ord. No. 3054-2013; Sec. 34-3402(d) repealed; new Sec. 34-3402(d) enacted; 11/19/13)

(Ord. No. 3019-2019; Sec. 34-3402 (b)(2), (c), (d)(1), (d)(2)(b), and (d)(4)(b) repealed; new Sec. 34-3402 (b)(2), (c), (d)(1), (d)(2)(b), and (d)(4)(b) enacted; 7/16/19)

#### SEC. 34-3403. ENVIRONMENTAL REMEDIATION WASTEWATERS.

(a) City Requirements. Environmental Remediation Wastewaters (ERW), as defined in this ordinance, that are conveyed to the City by truck, rail, dedicated pipeline or sanitary sewer may be accepted by the City if all the requirements set forth in the following provisions of this ordinance and all applicable administrative procedures established by the director of public works are met.

Discharges into the sanitary sewers of such ERW as defined in this ordinance shall pay an ERW Discharge Fee of ~~one and three quarter two and one quarter~~ cents (~~\$0.01750.0225~~) per gallon for each gallon of such wastewaters delivered to the City under the provisions of this ordinance. Such charge shall be in lieu of flow, BOD and TSS charges as established by ordinance and rate ordinances in effect from time to time. Except as specifically superseded or modified, all rates and charges applicable to ERW, as defined in this ordinance, by reason of any City ordinance or ordinances, shall continue to be due and payable.

(Ord. No. 3053-2013; Sec. 34-3403(a) repealed; new Sec. 34-3403(a) enacted; 11/19/13)

(b) Non-Hazardous Waste. In order for the City to receive any wastewater for treatment, there must be assurances that the wastewater is non-hazardous as defined in 40 CFR 261 and 35 Illinois Administrative Code 721. This means that it must not be a listed hazardous waste and it must pass the four criteria as found in 40 CFR 261 of Section 20, which are summarized as follows:

- (1) It must not be a flammable waste, i.e., flashpoint must be >140 F.
  - (2) It has a pH not lower than 2.0 or higher than 12.5.
  - (3) Does not contain any 'reactive' chemicals such as cyanides, sulfides capable of generating a toxic gas.
  - (4) Passes the Toxic Characteristic Leaching Procedure (TCLP), which means it complies with all the criteria. Copies of the analysis must be on file at the City.
- (c) Compliance with Sewer Use Ordinance. The ERW discharged must comply with the requirements as found in this Sewer Use Ordinance, General Pretreatment Requirements.

(d) ERW Discharge Permit:

- (1) The user is required to complete an Individual Discharge Permit Application in order to obtain an ERW Discharge Permit. The user would be required to get an ERW Discharge Permit

from the City before this particular ERW could be discharged. If the user has an existing Individual Discharge Permit, this permit would be amended to include these requirements.

(2) This ERW Discharge Permit would contain specific discharge limits and special conditions for the user. Permit review will follow the same time constraints as listed in Section 34-3404 of this ordinance. The potential user may have to provide certain chemical analysis and/or representative sample(s) to the City as necessary.

(Ord. No. 3019-2019; Sec. 34-3403 (d)(1) and (d)(2) repealed; new Section 34-3403 (d)(1) and (d)(2) enacted; 7/16/19)

(e) Permitted ERW Hauler. The aforementioned ERW that are hauled to the City by truck and tanker must be hauled by a City permitted ERW hauler. This is separate and different from IEPA special waste hauler permit, which is also required. The potential user can have its own truck and tanker permitted by filling out the appropriate City forms and paying the ~~fifty onw hundred~~ dollar (~~\$50-00100.00~~) permit fee. The permitted ERW hauler must comply with all City requirements relative to discharging at the treatment plant(s).

(f) Letter from IEPA. Where deemed necessary by the director of public works, the City will require a letter from the IEPA stating that the ERW is not a hazardous waste and shall determine that it is otherwise appropriate for the City to receive such waste.

(g) ERW Discharge Costs and Monitoring Charges. The City will bill the user for the ERW discharges into the sanitary sewers as per ordinance, which is currently ~~\$0.0175-0.0225~~ per gallon. The cost for City sampling and analysis are also covered in the ordinance, and are separate charges from ERW Discharge Fee.

(Ord. No. 3053-2013; Sec. 34-3403(g) repealed; new Sec. 34-3403(g) enacted; 11/19/13)

(h) Flow Metering Requirements. ERW that is discharged to the sanitary sewer from a facility must be measured volumetrically. This can be done either by installing a wastewater flow meter or a water metering device. If the ERW is trucked to the City's POTW for disposal, the volume discharged will be determined by the volume of the container or containment device on the truck.

(i) Sampling Manhole. For ERW discharged to the sanitary sewer, the potential user must provide a sampling point for the wastewater. In certain situations, a separate sampling manhole may be required. If a separate manhole is required, the sampling manhole must be constructed and approved according to City standards.

(j) IEPA Requirements:

(1) IEPA Construction Permit - If the potential user is required to install pretreatment equipment to control the pollutants in the ERW discharged, then the potential user would have to contact the Illinois Environmental Protection Agency, Division of Water Pollution Control (IEPA DWPC) concerning the need for a Construction Permit for the potential pretreatment system. The IEPA DWPC permit section would make the determination as to whether an IEPA Construction Permit would be necessary.

(2) IEPA Connection Permit - The potential users will have to obtain a Connection Permit if:  
1) the ERW will be hauled to the POTW(s), or 2) if the user is not already connected to the sanitary sewer, or 3) is already connected to the sanitary sewer, but the proposed ERW is

substantially different than the normal process wastewater discharged. To obtain an IEPA DWPC Connection Permit, the potential user must fill out the appropriate IEPA DWPC forms.

(3) Operator Class K License - If a pretreatment system is constructed, the IEPA may require a Certified Class K Operator for the pretreatment system. The IEPA Operator Certification Unit can assist in determining if a particular Class K Operator License is required for the personnel of a potential user to operate the pretreatment system.

(4) IEPA Special Waste Stream Permit - If the ERW is to be hauled to the City by truck, the user will have to obtain an IEPA Special Waste Stream Permit. This application will be filled out by the user and sent to the City for signature. The user will mail this to the IEPA DWPC with copies to the City. If a special waste hauler permit is necessary, the hauler would be required to manifest the waste. To obtain information on this kind of permit, contact the IEPA Division of Land Pollution Control Permit Section.

The above requirements are listed as guidance only. Other specific criteria may vary and will be provided to any request or at the time of request for discharge to the sanitary sewer as deemed appropriate to the director of public works or the IEPA DWPC.

(k) Surface Water Run-Off. If the ERW is surface water run-off from stormwater associated with industrial activity as defined in 40 CFR 122.26(b)(14), then it shall subject to ERW charge. However, if the source of ERW is potable water from washing of manufacturing services such as loading platforms and docks, then the industrial user shall not be subject to the ERW charge.

(l) Groundwater Monitoring Wells:

(1) Development Wastewater shall not be considered ERW and therefore shall not be charged at the rate of \$0.0175 per gallon, but shall be charged at the domestic rate and must first be settled out to remove suspended solids before discharging to sanitary sewer or at the treatment plant. For purposes of this subsection, development wastewater shall be that water which contains sediment and clay and is encountered when the wells must be drilled and "developed" prior to groundwater pumping commencing at the site of contamination.

(Ord. No. 3053-2013; Sec. 34-3403(l)(1) repealed; new Sec. 34-3403(l)(1) enacted; 11/19/13)

(2) Purge Water, of volumes less than twenty (20) gallons may be discarded to the sanitary sewer and not require permit so long as such purge waters comply with the limits found in this ordinance. Said purge water will not be subject to the ERW charges imposed elsewhere in this ordinance. For purposes of this subsection, purge water shall be that water which is pumped out of several well volumes throughout the life of the groundwater monitoring well in order to take samples for analysis on an approximately quarterly basis.

(m) Groundwater Clean-Up. If the Industrial User (IU) is involved in a groundwater clean-up which is generating ERW and wishes to use this ERW as a substitute for potable water in the normal processes which generate wastewater, then the IU shall not be charged the \$0.0175 per gallon ERW Discharge Fee. However, the IU must demonstrate and prove to the satisfaction of the City by clear and convincing evidence that it is not using this as process wastewater as a means of avoiding the \$0.0175 per gallon ERW Discharge Fee. As part of this test, the IU must prove that they have not increased the amount of normal process wastewater to accommodate all of the ERW that is generated.

(Ord. No. 3053-2013; Sec. 34-3403(m) repealed; new Sec. 34-3403(m) enacted; 11/19/13)

(n) Underground Storage Tanks (UST) Wastewaters. Wastewaters found in UST, which shall be removed as part of the UST Program are to be considered ERW. Since the removal of UST can be considered a form of environmental remediation, the wastewater generated from such a project, whether it be from the storage tank itself or removal and recovery of contaminated groundwater directly underneath the tank shall be considered ERW.

SEC. 34-3414. PRETREATMENT CHARGES AND FEES.

(a) Purpose. The City may adopt reasonable fees for reimbursement of costs of setting up and operating the City's pretreatment program which may include:

- (1) Fees for Individual Discharge Permit applications including the cost of processing such applications;
- (2) Fees for monitoring, inspection, and surveillance procedures including the cost of collection and analyzing a user's discharge, and reviewing monitoring reports submitted by users;
- (3) Fees for reviewing and responding to accidental discharge procedures and construction;
- (4) Fees for filing appeals; and
- (5) Other fees as the City may deem necessary to carry out the requirements contained herein. These fees relate solely to the matters covered by this ordinance and are separate from all other fees, fines, and penalties chargeable by the City.

(b) Established Permits and Fees.

(1) Permit Fees.

- a. An Individual Discharge Permit     \$~~400.00~~500.00
- b. Renewal of an Individual Discharge Permit     \$~~350.00~~400.00
- c. Supplemental (Baseline Monitoring) Report     \$~~125.00~~150.00
- d. Waste Hauler Permit
  - ERW             \$ ~~50.00~~100.00
  - Grease         \$ ~~50.00~~100.00
  - Septic         \$ ~~50.00~~100.00
  - Thin Stillage Corn syrup     \$ ~~50.00~~100.00
  - Industrial and Landfill Leachate     No Fee  
(included in an Individual Discharge Permit)

(2) Pretreatment Fees.

- a. Industrial User Sampling (per sample)     \$ ~~150.00~~175.00
- b. In-House Laboratory Testing Fees.
  - BOD<sub>5</sub>             \$ 20.00
  - Total suspended solids     \$ 16.00
  - Chemical oxygen demand     \$ 18.00
  - Oxygen demand index     \$ 18.00
  - pH             \$ 5.00
  - Fecal coliform     \$ 30.00
  - Ammonia             \$15.00

Formatted: Subscript

Total Phosphorus    \$30.00

c. Contract Laboratory Testing Fees.

Laboratory testing fees (testing done outside City) will be the cost of the laboratory test(s) plus ten percent (10%) of test cost(s).

(3) Hauled Waste Fees.

a. Camper Trailer Discharge

Camper trailers (Moline residents only)    No Fee  
Camper trailers (Non-Moline residents)    \$ 10.00

b. Hauled Wastewater Receiving Fees

(based on tank capacity of container per load)  
Industrial Waste (landfill leachate and thin stillage)

\$0.05/gallon – Moline Origin

~~\$0.05~~0.075/gallon – Non-Moline Origin (Rock Island County only unless otherwise approved by director)

Septic Waste

\$0.05/gallon – Moline Origin

~~\$0.07~~0.10/gallon – Non-Moline Origin (Rock Island County only unless otherwise approved by director)

Grease Trap Waste

\$0.15/gallon – Moline Origin

~~\$0.20~~0.25/gallon – Non-Moline Origin (Rock Island County only unless otherwise approved by director)

(4) Environmental Remediation Wastewater (ERW) Discharge Fee

~~\$0.0175~~0.0225/gallon

(Ord. No. 3029-2009; Sec. 34-3414 repealed; new Sec. 34-3414 enacted; 10/20/09)

(Ord. No. 3046-2011; Sec. 34-3414(c)(d) repealed; new Sec. 34-3414(c)(d) enacted; 11/22/11)

Ord. No. 3054-2013; Sec. 34-3414 repealed; new Sec. 34-3414 enacted; 11/19/13)

(Ord. No. 3025-2017; Sec. 34-3414(b)(2) repealed; new Sec. 34-3414(b)(2) enacted; 10/10/17)

(Ord. No. 3019-2019; Sec. 34-3414 (a)(1), (b)(1)(a), (b)(1)(b), and (b)(1)(d) repealed; new Sec. 34-3414 (a)(1), (b)(1)(a), (b)(1)(b) and (b)(1)(d) enacted; 7/16/19)

## Appendix 2

### Complete Lead Service Line Inventory

Lead Service Line Inventory Template

*Please enter information in the empty box next to each section	Water System Name		Moline		System ID Number:		IL1610450		Current Inventory Date:		4/15/2024	
*Please enter totals in the empty box next to each category	Total Service lines:	17,193	Total Lead:	3,859	Total Non-Lead:	10,045	Total Galvanized Requiring replacement:	873	Total Unknown:	2,416	Website link to Material Inventory:	

Service Address	Lead and Copper Sample site number.	Is this a high-risk Facility or Area?	Service Line Newly Identified Since Last Submitted Inventory	Year PWS-Owned Service Line was Installed	Year Customer Side Service Line was Installed	Source of Information Used for Service Line Identification	Gooseneck/Pigtail	PWS-Owned Service Line Material	Customer Side Service Line Material	Classification for Entire Service Line	Was Galvanized Service Line Material ever downstream of Lead?	Date Customer Notified of Lead Service Line	Was a Lead Service Line Previously Replaced at this Location?	Date Lead Service Line Replaced	Material of Service Line Replacement	Has the customer refused access to the property?	Date of customer waiver or IDPH notification, if customer refused access to property
	Lead and Copper Sample site number is the 7 digit number starting with "LP" or "LA". / If address is not a lead and copper sample site mark "N/A"	EXAMPLES:  Group Homes, Parks, Playgrounds, Special Care Facilities, Hospitals, Clinics, Child Care Facilities  Yes (Y) or No (N)	Yes (Y) or No (N)	What year was the PWS-Owned service line installed, if known?	What year was the customer side service line installed, if known?	How was the Material of this Service Line Identified? EXAMPLES: Construction Records, Visual Inspections, Survey Response, Maintenance Records, etc...	EXAMPLES: Copper - No Lead Solder (C) Copper - Lead Solder (CLS) Galvanized (G) Lead (L) Cast/Ductile Iron or Transite (O) Plastic - PVC, HDPE, PEX (P) Unknown (U) Unknown Not Lead (UNL)	EXAMPLES: Copper - No Lead Solder (C) Copper - Lead Solder (CLS) Galvanized (G) Galvanized Requiring Replacement (GRR) Lead (L) Cast/Ductile Iron or Transite (O) Plastic - PVC, HDPE, PEX (P) Unknown (U) Unknown Not Lead (UNL)	EXAMPLES: Copper - No Lead Solder (C) Copper - Lead Solder (CLS) Galvanized (G) Galvanized Requiring Replacement (GRR) Lead (L) Cast/Ductile Iron or Transite (O) Plastic - PVC, HDPE, PEX (P) Unknown (U) Unknown Not Lead (UNL)	EXAMPLES: Lead (L) Galvanized Requiring Replacement (GRR) Non-Lead (NL)	If any galvanized service line material was ever downstream of a Lead section, mark Yes (Y). If the galvanized service line material was never downstream of any Lead section, mark No (N). / If Yes, that section of service line should be marked as Galvanized Requiring Replacement in the appropriate immediately preceding column(s).	Enter date customer was notified of Lead Service Line. / If Service Line is not Lead put N/R	Yes (Y) or No (N)	If previous column was marked (Y), provide date the Lead Service Line was replaced. / Leave blank if previous column was (N).	EXAMPLES: Copper - No Lead Solder (C) Galvanized (G) Plastic - PVC, HDPE, PEX (P) Cast/Ductile Iron or Transite (O) Leave blank if no Lead Service Line was replaced.	Yes (Y) or No (N)	IF customer refused access to property, date waiver obtained by PWS or date PWS notified IDPH of refusal to sign waiver. / Leave blank if customer has not refused access.

## **IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER**

**The Community Water System (CWS) has determined that your property is likely serviced by a lead water pipe. Lead can cause serious health problems, especially for pregnant women and children 6 years and younger. Please read this notice closely to see what you can do to reduce lead in your drinking water.**

The CWS provides water that protects our residents from lead leaching into our water system. The CWS has not had a recent violation for lead levels. However, proper maintenance of the system to prevent the leaching of lead costs time, energy, and money. There is also the potential that something might go wrong and people with lead service lines would be exposed to lead in their drinking water.

### **Health Effects of Lead**

**It can cause damage to the brain and kidneys, and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones and can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development.**

### **Sources of Lead**

The source of water from Lake Michigan does not contain lead. When water is in contact with service lines or plumbing that contains lead for several hours, the lead may enter drinking water. Homes built before the 1960s in our community are more likely to have lead service lines and lead in solder and plumbing fixtures.

Don't forget, most lead exposure is still from small children ingesting lead paint, dust, and soil. In addition, lead can be found in certain types of pottery, pewter, brass fixtures, food, and cosmetics. Other sources include exposure in the work place and exposure from certain hobbies (lead can be carried on clothing or shoes). Lead is found in some toys, some playground equipment, and some children's metal jewelry. Wash your children's hands and toys often as they can come into contact with dirt and dust containing lead.

### **Steps That You Can Take to Reduce Your Exposure to Lead in Your Drinking Water**

1. *Run your water to flush out lead.*
  - a. If the plumbing in your home is accessible; you may be able to inspect your own plumbing to

- determine whether you have a lead service line. Otherwise, you will most likely have to hire a plumber, or allow the Village to inspect your water line.
- b. If you do not have a lead service line, running the water for 1 - 2 minutes at the kitchen tap should clear the lead from your household plumbing to the kitchen tap. Once you have done this, fill a container with water and store it in the refrigerator for drinking, cooking, and preparing baby formula throughout the day.
  - c. If you do have a lead service line, flushing times can vary based on the length of your lead service line and the plumbing configuration in your home. The length of lead service lines varies considerably.
  - d. The following flushing guidelines are recommended by the American Water Works Association after a lead service line is replaced:
    - i. Find all the faucets that will drain, including the basement and all floors in your house.
    - ii. Remove aerators and screens whenever possible, including the shower heads, from all faucets you plan to flush.
    - iii. Include the laundry tubs, hose-bibs, bathtubs, and showers as flushing points.
    - iv. After all the aerators are off, open the faucets in the basement or lowest floor in the house. Leave all faucets running at highest rate possible, using cold water.
    - v. After the faucets are all open in lowest floor, open the faucets on next highest floor of the house. Continue until faucets are open on all floors.
    - vi. After all faucets are opened, leave the water running for at least 30 minutes.
    - vii. After 30 minutes, turn off the first faucet you opened and continue to turn off other faucets in the same order you turned them on.
    - viii. Clean aerators/screens at each faucet. You may need to replace screens/aerators if too old or worn
2. *Use cold water for drinking, cooking, and preparing baby formula.*
    - a. Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water.
    - b. Do not use water from the hot water tap to make baby formula.
  3. *Look for alternative sources or treatment of water.*
    - a. You may want to consider purchasing bottled water; or
    - b. Purchase a water filter that is certified to remove "total lead". The filter should be NSF 53 and NSF 42 certified.
  4. *Clean and remove any debris from faucet aerators on a regular basis.*
  5. *Do not boil water to remove lead.* Boiling water will not reduce lead.
  6. *Purchase lead free faucets and plumbing components.*
  7. *Remove the entire lead service line.*
    - a. *As part of the separate Lead Service Line Replacement program, should you agree to participate, the Village will replace your lead service line from the water main to the meter inside your home.*
  8. *Test your water for lead.*
    - a. Call us at: 815-412-2015 to find out how to get your water tested for lead. While we do not do the testing, we can provide a list of laboratories certified to do the testing. Laboratories will send you the bottles for sample collection. Please note that we are not affiliated with the laboratories, and they will charge you a fee.
      - If test results indicate a lead level above 15 ug/L, bottled water should be used by pregnant women, breast-feeding women, young children, and formula-fed infants.
    - b. Approximately one month after service line replacement, testing is recommended. The sample should be a first-draw sample after water has not been used for at least 6 hours. The sample must be collected from a tap used frequently inside the home, preferably from the kitchen.
    - c. As a precaution, until the sample is collected and analyzed, the customer is recommended to do a mini-flush of premise plumbing by running tap water each morning or when the water sits in the pipe for at least 6 hours. Flush for 5 minutes to displace water that has been sitting in the pipes inside the house and in the service line. This could include taking a shower, running the dishwasher, flushing a toilet, collecting water for plants/garden, or running the faucet. The customer should do this before using any

water for drinking, cooking, infant formula, and so on. Daily miniflushes should continue for six months or until lead sample results show the lead level is below the regulatory guideline. The customer should clean debris from aerators and screens once a month for six months. After six months, clean debris twice a year.

### **For More Information**

**Call us at () or visit our website at (). For more information on reducing lead exposure around your home/building and the health effects of lead, visit EPA's website at [www.epa.gov/lead](http://www.epa.gov/lead) or contact your health care provider.**

Thank you for reading this notice, and we hope to hear from you soon.
