1.0 Overview

1.1 Introduction

The Lead Service Line Replacement and Notification Act (Act), State of Illinois Public Act 102-0613, went into effect on January 1, 2022. This Act required that every owner or operator of a community water supply (CWS) that has known or suspected lead service lines (LSLs) create a plan to replace each lead and galvanized service line (if connected downstream of lead piping); submit that initial plan to the Illinois Environmental Protection Agency (Agency) by April 15th, 2024; submit by April 15th of each year after 2024 until 2027 an updated lead service line replacement plan to the Agency; and submit by April 15th, 2027 a final lead service line replacement plan to the Agency. The Act also requires that the plan is posted on the community water supply's website.

The Act also requires that the plan is posted on the community water supply's website. This Plan will be available on the City's website until April 15, 2025, at which time it will be replaced with an updated Plan.

The City of Watseka has prepared an initial Lead Service Line Replacement Plan (Plan) in compliance with the Act and its requirements. The Plan includes the name and identification number of the CWS; an inventory of the total service lines, known and suspected LSLs, and LSLs that have been replaced since 2020; a proposed replacement schedule; a cost analysis with financing options; a prioritization plan; community outreach measures; and workforce development measures.

2.0 Background Information

2.1 Location

The City of Watseka is located in Iroquois County in northeastern Illinois approximately 10 miles west of the Indiana border. The City corporate boundaries encompass an area of approximately 2.94 square miles.

2.2 Community Water Supply (CWS)

The Community Water Supply (CWS) is named Watseka and is IEPA Water System No. IL0750900. The CWS serves a population of 5,500 and has 2,500 service connections as reported to the IEPA and posted to Illinois.gov under the Illinois Drinking Water Watch.

The CWS takes ownership of the service line extending from the water main to the water shut-off valve or Buffalo Box (b-box)/curb stop while the property owner takes ownership of the service line from the water shut-off valve or Buffalo Box (b-box)/curb stop according to the City's Code of Ordinances, listed in Appendix 1.

3.0 Lead Service Line Inventory (LSLI)

3.1 Summary

The definitions of water service line materials in the CWS's inventory adheres to the definitions provided by the Illinois EPA. These definitions are outlined in the table below.

Service Line Material
Copper – No Lead Solder (C)
Galvanized Requiring Replacement (GRR)
Lead (L)
Cast/Ductile Iron (O)
Unknown (U)
Unknown Not Lead (UNL)

The CWS has made ongoing efforts to complete its inventory. These efforts include those listed below: reviewing resident surveys, water meter replacement records, a property’s building age, exploratory excavations at targeted locations, visual inspection of interior service lines, and predictive modeling for properties without known material type.

- **Building Age:** For those buildings constructed after 1988, service lines are assumed to be non-lead on both the public and private sides.
- **Historical Records:** Where available, historical records were used to identify service line material. Historical records could include water meter replacement records, water main replacement records, water main tapping cards, water meter cards, permit records, and documentation from maintenance and repairs.
- **Visual Identification:** The CWS staff recorded service line material when entering private property.
- **Resident-Provided Photos:** The CWS distributed a survey in which residents could provide photos of their service line. A sample survey mailer is included in Appendix 6. Trained staff identify the service line material based on the photos and the photo and material are recorded and saved on the CWS GIS.
- **Predictive Modeling:** Those addresses for which there are no historical records or survey responses to verify the private side of the material and are within the time period in which lead services were installed were included in a machine learning predictive model that correlates service line material to building characteristics. Any addresses that have a greater than 50% chance of having a lead service is considered suspected lead on the inventory spreadsheet.

The current inventory includes:

- The total number of services lines in the CWS for the current year;
- The material composition of each service line in the CWS’s distribution system;
- The count of suspected lead service lines identified since the last inventory submission;
- The number of suspected or known lead service lines replaced since the last inventory submission

A copy of the inventory submitted to the Agency that lists the total number of service line connections, total LSLs, and total suspected LSLs is included in Appendix 2. A map of the building ages in the CWS is included in Appendix 3. Buildings built prior to 1970 have a higher probability of having a lead service.

Service Material	# of Services	
	Public	Private
Lead (L)	0	76
Unknown Suspected Lead (U)	0	13
Galvanized Requiring Replacement (GRR)	0	2
Not Lead	2165	1074

3.2 Previous Replacements

The CWS has not begun replacing lead and galvanized service lines.

4.0 Funding Considerations

The funding sources for the Lead Service Line Replacement (LSLR) Program will be considered and evaluated in this section. A proposed funding plan to meet the requirement to complete the LSLR within the fifteen (15) year replacement timeframe will be presented.

Based on an inventory of 78 LSLs and a replacement cost of \$11,000, the CWS will need \$858,000 to fund the LSLR Program. The CWS will likely use a combination of the funding sources described in this section. With a mandated replacement rate of 7%, the CWS will plan to replace 6 LSLs annually at a projected cost of \$66,000.

4.1 Federal & State Funding Sources

Other possible funding sources would be periodically evaluated for favorability and affordability. These funding sources could include:

Illinois Environmental Protection Agency (IEPA) State Revolving Fund Loan Program (SRF)

Illinois Department of Commerce and Economic Opportunity (DCEO) Grants

HUD-administered Community Development Block Grant (CDBG)

Congressional Discretionary Funding

4.1.1 IEPA State Revolving Fund (SRF)

The Bipartisan Infrastructure Act reserved \$15 billion in funding for LSLR in the United States over five years. To date, the State of Illinois has received \$337.1 million in the first two years of funding. The amount of funding reserved for LSLR in the State of Illinois for the next three years is unknown. This funding is available as low-interest and forgivable loans allocated through the Illinois EPA SRF loan program.

The IEPA SRF loan program awards loans according to census tract scoring that considers demographic information that will be discussed in more detail in the Prioritization section. A preliminary census tract ranking system was developed with available census data and 2023 inventory information. The ranking may change with updates to the census demographic data or with any changes in the number and density of lead services. This ranking system is developed using the best available knowledge and will be updated annually with new information.

For planning purposes, the CWS will assume that it receives forgivable loans for LSLR in census tracts with a combined score higher than 300 and 0% interest loans for LSLR in census tracts with a combined score higher than 250.

0% Interest Loan Census Tract	Score	Rank	LSLs
Census Tract 9504, Iroquois County, Illinois	255	1445	8
Census Tract 9505, Iroquois County, Illinois	240	1904	70

Current estimates suggest that the SRF loan program could provide 0% interest loans for 78 LSLRs within the CWS, which accounts for 100% of the CWS's LSLRs. The 0% interest loan funding is estimated to be approximately \$858,000.

4.1.2 Illinois Department of Commerce and Economic Opportunity (DCEO) Grant

The Office of Community Development supports economic development, community development, and infrastructure improvements in Illinois communities with substantial low-to-moderate-income populations. Various DCEO grants can be used for LSLR funding. The CWS will periodically review available grants.

4.1.3 HUD Community Development Block (CDB) Grant

The Office administers the federally funded Community Development Block Grant (CDBG) program that assists low-income populations. LSLR Programs are eligible for CDBG funding in qualifying areas. The CWS will evaluate their eligibility for CDBG funding.

4.1.4 Congressional Discretionary Funding

Each member of the United States Congress receives an allotment of grant funding to be used at their discretion annually. While no funding has been awarded and it is unlikely that Congressional Discretionary Funding will be a significant source of funding, this source of funding is still an option to fund a portion of a project.

4.1.5 United States Environmental Protection Agency (USEPA) Community Change Grants

The USEPA has recently funded \$2 billion for the Community Change Grants to be used in pollution reduction projects, which would include lead service line replacements. The maximum amount the CWS may receive for lead service line replacements is \$20 million. The below census tracts are eligible for Community Change Grant funding. Those census tracts that are in bold are unlikely to receive IEPA SRF funding and are the suggested project areas for a Community Change grant award.

Census Tract	LSLs
Census Tract 9504, Iroquois County, Illinois	8

4.2 Revenue-Generating Funding Sources

The local and direct revenue generating methods that are evaluated in the Plan are:

- Increased local sales taxes
- Resident cost sharing
- Water rate increase
- Increase of other taxes

The proposed taxes and fees would be continuous revenue sources set at rates to meet the mandated annual LSLR rate.

4.2.1 Increased Local Sales Tax

Communities, counties, and sports authorities have imposed a modest sales tax increase over a determined period of time to generate revenue from the constituents that benefit from the proposed improvement.

The City of Watseka municipal Sales Tax generated \$1.37 million in FY23. The sales tax rate for retail sales in Watseka is:

Illinois	6.25%
Iroquois County	0.25%
Witseka	0.75%
	7.25%

Therefore, if the Watseka Municipal Sales Tax were increased 0.25%, an additional \$47,300 (0.25/7.25 x \$1.37 million) would be available annually for LSLR. If the tax were increased 0.50% then \$94,700 could be available annually for LSLR. An increase in local sales tax could fund 4 or 8 LSLRs annually, respectively.

4.2.2 Resident Cost Sharing

Resident cost sharing is another revenue-generating method that shares the cost of replacement with those whose properties are affected. A cost sharing program that includes a \$25/month replacement charge on the water bill for twenty years would generate \$300 per LSLR per annum and \$6,000 over the repayment period. This repayment amount covers the approximate cost of the private side of the replacement while remaining affordable for affected water customers.

The CWS will evaluate this method based on affordability and ease of implementation. This method would require the ability to tie the cost sharing to the property title so that it transfers with any change of property ownership. This method is also more feasible when the intent is to cover annual loan repayments versus the total construction cost for that year.

4.2.3 Water Rate Increase

The CWS can consider raising rates to fund the LSLR Program. The rate increase will be evaluated for affordability and for its ability to fund the Program. A rate increase of 5% would generate an additional \$57,000 annually from the \$1.14 million generated in fees in FY23. The current water rates are included in Appendix 4.

4.2.4 Increase of Other Tax Sources

Besides sales and property taxes, the State of Illinois has about twenty-six other revenue sources as taxes, fees, assessments, license fees, lottery, use fees, transfer tax and user fees ranging from Automobile Renting Occupation and Use Tax to Video Gaming Tax and License Fee. The time to enact a tax in any form to fund the LSLR is prohibitive and the likelihood of enactment is very low, based on existing taxes. Additional revenue from State funding or from Federal sources into a State administered fund is not guaranteed.

4.3 Potential Funding

The CWS could use a combination of any of the methods discussed above to generate sufficient funds to cover the replacement costs. However, it is the intent of the CWS to maximize grants and forgivable loan awards to cover LSLR costs.

4.4 Financial Plan

The CWS will consider all funding sources listed above. The financial plan, like the other elements of the Plan, is a living document and can change as the availability of funding changes. Currently, the CWS plans to take advantage of the SRF loan program to fund the next replacements.

The CWS will continue to develop a financial plan for future replacements as more information on the inventory, bidding environment, and funding is gathered.

5.0 Prioritization

Since the number of LSLs in the system exceeds the number of replacements the CWS can afford in a single year, the LSLR Program must include an element of prioritization. The CWS will follow the mandated replacement rate of 7% or 6 LSLs per year for 15 years laid out in the Act. The CWS will prioritize replacement project areas based on risk factors and planned companion infrastructure projects.

5.1 Risk Factors

The population most at risk of exposure to lead and with the highest health risks when exposed is children and seniors in disadvantaged areas. The IEPA SRF loan program incorporates census data for median household income, children under the age of 6, unemployment rate, poverty rate, social security rate, and supplemental security income to prioritize at-risk populations. The CWS will use the IEPA SRF scoring system to prioritize those areas with the most at-risk populations.

The CWS will also prioritize replacements in high-risk facilities such as daycares, schools, parks, hospitals, and nursing homes.

It should be noted that some homes in the City are within a floodplain. Homes outside of the floodplain will be prioritized over those within the floodplain, as these homes are more likely to remain long-term.

5.2 Prioritization Factors by Vermont Department of Environmental Conservation

When the service area of the CWS with the same level of risk contains more lead services than can be replaced in a year, the CWS will consider companion infrastructure projects such as water main replacements, water meter replacements, and road resurfacing projects when prioritizing each year's project area.

The Vermont Department of Environmental Conservation developed a prioritization rubric as a standard and transparent method for determining replacement order according to the factors discussed. The table below lists the prioritization factors and priority points as recommended by the Vermont Department of Environmental Conservation and then the priority points developed by the CWS to account for the Illinois-specific requirements of the Act and IEPA SRF-funding.

As each LSL is identified and categorized with any possible number of the prioritization factors listed below, the summation of the factors yields a prioritization points Score using the rubric, as a guide to scoring based on the criteria, as shown below.

Priority Points – Vermont Department of Environmental Conservation	CWS /REL Priority Points	Prioritization Factor	LCRR Requirement
10	8	Known Lead Service Line	Required
10	80	Populations Most Sensitive to the Effects of Lead <ul style="list-style-type: none"> • Schools and Day Care Facilities • Homes with children and/or adults who are pregnant or may become pregnant 	Required
10	10	Disadvantaged Communities	Required
8	8	Known GRR Service Line	Required
5	2	Populations Most Sensitive to the Effects of Lead <ul style="list-style-type: none"> • Nursing Homes • Medical Facilities 	Not Required
5	8	Companion Projects (concurrent infrastructure projects)	Not Required
5	8	Compact Projects (concurrent project in the same area)	Not Required
3	8	Long Length Lead Pipe Projects (or high lead results)	Not Required
2	6	Other Factors Listed in ANSI/AWWA C810-17 § II.A. <ul style="list-style-type: none"> • Service lines physically disturbed by digging, excavation, repair, or other activities • Existing partial lead service line replacements • Consideration of presence of lead goosenecks or pigtails 	Not Required
N/A	20	Funding Eligibility	Not Required
N/A	5	LSL Density	Not Required
1	5	Other Factors Significant to the Water System	Not Required

5.3 Emergency Work-related Lead Service Line Replacement (EW-LSLR)

LSLR instances arising from breaks or leaks on the public side of the service line are completed under this program. Upon notification of a break or leak from the customer, the Water Department dispatches a crew to assess the location and feasibility of repair. Subsequently, an EW-LSLR is initiated to replace the affected lead service. Private-side breaks or leaks are not covered under this program.

6.0 Lead Service Line Replacement (LSLR)

6.1 Scope of LSLR

The work shall consist of the removal and replacement of lead or galvanized iron water services for buildings within the specified service area. The area will be determined based on prioritization, material, building age, and funding limits, but all will be within the corporate boundaries of the CWS. New copper service lines shall be installed for full and partial lead service line replacement. Full lead service line replacement shall be defined as connecting from the water main to inside the building. Partial service line replacement shall be defined as connecting from the curb box (B-box or buffalo box) to the water main. No lead piping will be left in the water system. Partial replacements will only occur where the existing service is partially lead or galvanized. Cross-sectional replacement details are included in Appendix 5.

Replacements will begin in Census Tract 9504. These replacements are expected to last two years at the mandated replacement rate but will depend on the maximum amount of annual IEPA SRF funding received.

6.2 Replacement Methods

The methods of installing the new service are described below. To minimize impacts to residential property and to reduce restoration, trenchless methods are preferred.

Open cut: Open cut trenching is the typical method used by plumbers, especially for properties slated for demolition and replacement. It involves digging a trench, which can cause significant exterior disruption to property owners. Interior disturbances depend on whether the basement is finished. Despite its disturbance, open cut trenching is often the most cost-effective option, particularly when restoration costs are minimal. This approach is advised based only on individual circumstances.

Trenchless: Trenchless installation of water services is being explored to address concerns such as economic impact, landscape disruption, and social inconveniences associated with traditional open cut methods. Advances in trenchless technologies offer a more efficient alternative in certain situations, minimizing surface disruption and restoration time. These methods are socially appealing as they cause less destruction and require less restoration compared to open cut techniques.

Standard Horizontal Directional Drilling: Standard Horizontal Directional Drilling (HDD) involves using a drill rig on the ground surface to create a tunnel underground. To reach a depth of about 5'6" below the ground surface, the drill rig head must be positioned approximately 30 feet away from the final depth point of the water service. This may require closing the road for safety. While many pipeline and cable contractors employ this method, plumbing contractors often subcontract it out as specialty work.

Pipe pulling: Pipe pulling is the most cost-effective method among trenchless options for installing water services. It involves using the path of the existing pipe, eliminating the need for additional excavation. A new water service pipe is pulled along the existing route, often with a winch or excavator bucket with a cable. The new copper service is connected to the existing lead service in the home, effectively replacing it using the borehole left by the removed lead pipe.

The connection to the water main typically incorporates the use of a tapping sleeve and is done by a licensed plumber. The licensed plumber also connects the new service line to the existing water meter inside the house according to the State of Illinois plumbing code.

Prior to completion of the work, the Contractor shall provide each address that received a new service line with a Point of Use water filter that meets both NSF/ANSI 42 and 53 certifications for lead reduction with a minimum capacity of 0.5 gallons and six months of replacement cartridges or a minimum of 150 gallons of filtration capacity. The filter shall not be a permanent faucet filter. The Contractor shall have the resident provide a signature to acknowledge receipt of the filter on a form provided by the City. The form shall be turned in with other documentation.

Prior to beginning the work of connecting the new service inside the house, the water supply to the service line and the property owner shall be shut off to avoid release of particulate lead into the property owner's premises. After all connections have been completed, the Contractor shall flush the water from an outside connection (such as a hose bibb or hose leading from the building side of the meter) to remove any particles in the service line. Flush at full velocity for at least 30 minutes. The

Contractor shall then advise the property owner to flush the interior premise plumbing in accordance with the instructions provided in the Owner-provided informational material. This work shall be conducted in accordance with AWWA C810-17 – Replacement and Flushing of Lead Service Lines.

The City will use these standards when performing lead service line replacement:

Item	Condition
1. Restoration of Interior and Exterior	Meet existing condition or better
2. Parkway/Yard Restoration	Sod, Seed in Summer
3. Field Locate B-boxes	Location by City
4. Trench backfill	CA-6
5. Verify B-box operation at Project Completion – after surface restoration	B-boxes keyed by City
6. Street Cross Sections	Minimum 6-inch pavement patching
7. Work Hours	Monday to Friday 7 am to 7 pm Saturday 8 am to 7 pm No Work Sunday or Holidays, except Contractor my Schedule meeting/inspection at buildings on Sunday.
8. Meter Pits	City will be consulted prior to relocating meter to building interior and abandoning the meter pit. Contingency Pay Item for this work included in contract.
9. B-box	Mueller H-10302, Minneapolis Pattern or approved equal
10. Curb stop	Mueller Ball Style: H15150 or approved equal
11. Corp Stop	Mueller H-15000 or approve equal
12. Saddle for corp stop	Cascade CSC-2 or approved equal
13. Abandon existing Lead Service Line	Close corp stop; remove lead service from main; remove corp and reuse direct tap by placing tapping sleeve and peen end of lead service. Use abandoned corporation fitting for winter time.

6.3 Completed LSLR

The CWS has not completed any lead service line replacement projects.

7.0 Workforce Development

In performing projects associated with the Lead Service Line Replacement initiative, the CWS plans to develop the workforce available to perform these projects. These developmental practices include:

Smaller bids: The CWS will break the required replacements into smaller projects within the CWS, so that the bids will be smaller and more attainable for smaller firms.

College engagement: The CWS will engage with local colleges and institutions to train new individuals entering the workforce.

Hiring local: The CWS will include a clause within the scope of work for interior work and inspections to be conducted by local contractors who have an understanding of the community.

Experience contractor teaching: An experienced contractor teaches a smaller contractor how to perform the work.

Diversity in hiring practices are another aspect to workforce development and would include contacting all local MBE and WBE contractor associations during bidding.

The Contractor shall also take the following specific affirmative action to ensure equal employment opportunity:

- Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the Contractor's employees are assigned to work. The Contractor, where possible, will assign two or more women to each construction project. The Contractor shall specifically ensure that all foremen, superintendents, and other on-site supervisory personnel are aware of and carry out the Contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.
- Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the Contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.
- Maintain a current file of the names, addresses and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the Contractor by the union or, if referred, not employed by the Contractor, this shall be documented in the file with the reason; therefore, along with whatever additional actions the Contractor may have taken.
- Provide immediate written notification to the Director when the union or unions with which the Contractor has a collective bargaining agreement has not referred to the Contractor a minority person or woman sent by the Contractor, or when the Contractor has other information that the union referral process has impeded the Contractor's efforts to meet its obligations.
- Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the Contractor's employment needs, especially those programs funded or approved by the Department of Labor.
- Disseminate the Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.
- Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions including specific review of these items with onsite supervisory personnel such as Superintendents, General Foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.
- Disseminate the Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the Contractor's EEO policy with other Contractors and Subcontractors with whom the Contractor does or anticipates doing business.

- Direct its recruitment efforts, both oral and written, to minority, female and community organizations, to schools with minority and female students and to minority and female recruitment and training organizations serving the Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the Contractor shall send written notification to organizations such as the above, describing the openings, screening procedures, and tests to be used in the selection process.
- Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer and vacation employment to minority and female youth both on the site and in other areas of a contractor's work force.
- Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR Part 60-3.
- Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.
- Ensure that seniority practices, job classifications, work assignments and other personnel practices, do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the Contractor's obligations under these specifications are being carried out.
- Ensure that all facilities and company activities are non-segregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.
- Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.
- Conduct a review, at least annually, of all supervisors' adherence to and performance under the Contractor's EEO policies and affirmative action obligations.

8.0 Resident Communication and Outreach

To ensure effective community engagement, the CWS's outreach program for the Lead Service Line Replacement (LSLR) initiative will employ various communication methods aimed at informing and involving homeowners. Central to the program's success is consistent and informative communication across multiple platforms, including meetings, press releases, door-to-door notifications, and social media channels. By leveraging these diverse communication channels, the program aims to raise widespread awareness about the significance of the LSLR program and the options available for homeowners to participate. Early successes of the program will be shared with the community to foster positive feedback and encourage support for the initiative.

To effectively communicate the goals and requirements of the LSLR program, a comprehensive outreach & communication plan is developed, outlining key messaging, target audiences, and preferred communication methods. Emphasis will be placed on building trust and transparency with homeowners, ensuring they understand the benefits of participating in the program. Notices will be sent to homeowners at least 45 days before the commencement of work, with repeated notifications every two weeks until confirmation of receipt. Special attention will be given to non-English speakers, providing translated notices and instructions for accessing additional resources. As previously mentioned, the Community Outreach and Public Engagement plan will be vast, consistent, and includes:

Stakeholder Identification: The CWS has Identified key stakeholders, including residents, local businesses, community organizations, schools, healthcare providers, and governmental agencies.

Educational Materials: The CWS is developing comprehensive educational materials explaining the importance of lead service line replacement, potential health risks associated with lead exposure, details of the replacement process, and available resources for assistance. The materials currently developed and used for LSLR outreach are added in Appendix 6.

Multi-Channel Communication: The CWS plans to utilize a variety of communication channels to reach different segments of the community, including:

- Printed materials such as program brochures, flyers, door hangers and direct mail distributed to households, businesses, and public spaces.

- Digital platforms including the City website, email newsletters, community forums, radio stations and other media press releases.

- Information sessions and workshops held at community centers, schools, and other public venues.

- Door-to-door outreach by trained community volunteers or outreach workers to engage directly with residents.

Social Media Channels: The CWS intends to utilize its social media platforms (Facebook) to engage with residents regarding lead exposure concerns. Posts will include links to informative resources on the CWS's website, as well as videos and webinars explaining lead risks and the CWS's efforts to mitigate them. Social media will also be used to announce upcoming project activities, public outreach events, and success metrics such as the percentage of lead pipes replaced.

Language and Accessibility: The CWS will ensure that all materials and communication efforts are available in multiple languages to accommodate the linguistic diversity of the community. Additionally, make information accessible to individuals with disabilities by providing alternative formats such as large print or audio versions.

Personalized Outreach: The CWS will tailor outreach efforts to specific demographics or neighborhoods within the service area, taking into account factors such as income level, age, cultural background, and housing status. Engage community leaders and influencers to help disseminate information and encourage participation.

Community Workshops and Events: The CWS has plans to organize community workshops, town hall meetings, and informational events where residents can learn more about the lead service line replacement program, ask questions, and provide feedback. Offer opportunities for hands-on demonstrations or tours of the replacement process and an avenue for public comment on the LSLR plans.

One-on-One Assistance: The CWS intends to provide personalized assistance and support to residents who may have questions or concerns about the replacement program. Establish a dedicated hotline or helpline staffed by knowledgeable personnel to address inquiries and provide guidance.

Feedback Mechanisms: The CWS plans to implement feedback mechanisms such as surveys, focus groups, or public hearings to gather input from residents throughout the planning and implementation phases of the program. Use this feedback to adjust and improvements as needed.

Collaboration and Partnerships: The CWS plans to collaborate with local organizations, community groups, schools, healthcare providers, and government agencies to amplify outreach efforts and leverage existing networks and resources.

Ongoing Engagement: The CWS will maintain ongoing communication and engagement with the community beyond the initial outreach phase. Provide regular updates on the progress of the replacement program, share success stories, and continue to address any concerns or issues that arise.

Non-Participation/Waivers: Homeowners in the CWS may not always be ready to engage with or communicate regarding the LSLR program. At present, the CWS lacks the authority to mandate homeowner access to private property or demand access for replacing the private side of the LSL. For those who choose not to participate, an Illinois Department of Public Health waiver form will be available. Efforts to communicate will be recorded for unresponsive homeowners. Nevertheless, these households will still receive complimentary point-of-use filters along with six replacement cartridges.

Appendix 1

Code of Ordinances

10-1-7: SERVICE PIPES:

A. Installation: All service pipes from the lot line to the premises to be served shall be installed by, and at the cost of, the owner of the property involved or of the applicant for the service. Such installations shall be made under the supervision of the Superintendent of the Water Department. The City shall install all service pipes from the main to the lot line; provided, that the proper fee or charge therefor has been paid.

(1980 Code § 35-26)

B. Specifications: No service pipe shall be installed unless it conforms to specifications drawn up by the Superintendent of the Water Department and approved by the City Council, a copy of which specifications shall be kept on file by the City Collector and shall be open to inspection by any interested person.

(1980 Code § 35-27)

C. Repairs: All repairs to service pipes and the plumbing systems of buildings shall be made by and at the expense of the owners of the premises served; except, that meters may be repaired by the City. The City may, in case of an emergency, repair any service pipes, and if this is done, the cost of such repair work shall be repaid to the City by the owner or user of the premises served.

(1980 Code § 35-28)

D. Excavations: Excavations made for installing service pipes or repairing the same shall be made in compliance with code provisions relating to excavations in streets (see title 9, chapter 4 of this Code); provided, that it shall be unlawful to place any service pipe in the same excavation with, or directly over, any drainpipe or sewer pipe.

(1980 Code § 35-29)

E. Nonliability Of City: The City shall not be liable for any damage caused by a leak or break in any service pipe, or for any damage caused by the repair or installation of such pipes resulting therefrom, when such work is not done by the City, nor shall the City be held liable for any damage caused by a failure to repair any leak or break in any service pipe.

(1980 Code § 35-32)

Complete Lead Service Line Inventory

Lead Service Line Inventory Template

*Please enter information in the empty box next to each section	Water System Name	Watseka			System ID Number:	IL0750900		Current Inventory Date:	4/15/2024		
*Please enter totals in the empty box next to each category	Total Service lines:	2165	Total Lead:	76	Total Non-Lead:	2074	Total Galvanized Requiring replacement:	2	Total Unknown:	13	Website link to Material Inventory:

Service Address	Lead and Copper Sample site number.	Is this a high-risk Facility or Area?	Service Line Newly Identified Since Last Submitted Inventory	Year PWS-Owned Service Line was Installed	Year Customer Side Service Line was Installed	Source of Information Used for Service Line Identification	Gooseneck/Pigtail	PWS-Owned Service Line Material	Customer Side Service Line Material	Classification for Entire Service Line	Was Galvanized Service Line Material ever downstream of Lead?	Date Customer Notified of Lead Service Line	Was a Lead Service Line Previously Replaced at this Location?	Date Lead Service Line Replaced	Material of Service Line Replacement	Has the customer refused access to the property?	Date of customer waiver or IDPH notification, if customer refused access to property
	Lead and Copper Sample site number is the 7 digit number starting with "LP" or "LA". / If address is not a lead and copper sample site mark "N/A"	EXAMPLES: Group Homes, Parks, Playgrounds, Special Care Facilities, Hospitals, Clinics, Child Care Facilities Yes (Y) or No (N)	Yes (Y) or No (N)	What year was the PWS-Owned service line installed, if known?	What year was the customer side service line installed, if known?	How was the Material of this Service Line Identified? EXAMPLES: Construction Records, Visual Inspections, Survey Response, Maintenance Records, etc...	EXAMPLES: Copper - No Lead Solder (C) Copper - Lead Solder (CLS) Galvanized (G) Lead (L) Cast/Ductile Iron or Transite (O) Plastic - PVC, HDPE, PEX (P) Unknown (U) Unknown Not Lead (UNL)	EXAMPLES: Copper - No Lead Solder (C) Copper - Lead Solder (CLS) Galvanized (G) Galvanized Requiring Replacement (GRR) Lead (L) Cast/Ductile Iron or Transite (O) Plastic - PVC, HDPE, PEX (P) Unknown (U) Unknown Not Lead (UNL)	EXAMPLES: Copper - No Lead Solder (C) Copper - Lead Solder (CLS) Galvanized (G) Galvanized Requiring Replacement (GRR) Lead (L) Cast/Ductile Iron or Transite (O) Plastic - PVC, HDPE, PEX (P) Unknown (U) Unknown Not Lead (UNL)	EXAMPLES: Lead (L) Galvanized Requiring Replacement (GRR) Non-Lead (NL)	If any galvanized service line material was ever downstream of a Lead section, mark Yes (Y). If the galvanized service line material was never downstream of any Lead section, mark No (N). / If Yes, that section of service line should be marked as Galvanized Requiring Replacement in the appropriate immediately preceding column(s).	Enter date customer was notified of Lead Service Line. / If Service Line is not Lead put N/R	Yes (Y) or No (N)	If previous column was marked (Y), provide date the Lead Service Line was replaced. / Leave blank if previous column was (N).	EXAMPLES: Copper - No Lead Solder (C) Galvanized (G) Plastic - PVC, HDPE, PEX (P) Cast/Ductile Iron or Transite (O) Leave blank if no Lead Service Line was replaced.	Yes (Y) or No (N)	IF customer refused access to property, date waiver obtained by PWS or date PWS notified IDPH of refusal to sign waiver. / Leave blank if customer has not refused access.

IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER

The Community Water System (CWS) has determined that your property is likely serviced by a lead water pipe. Lead can cause serious health problems, especially for pregnant women and children 6 years and younger. Please read this notice closely to see what you can do to reduce lead in your drinking water.

The CWS provides water that protects our residents from lead leaching into our water system. The CWS has not had a recent violation for lead levels. However, proper maintenance of the system to prevent the leaching of lead costs time, energy, and money. There is also the potential that something might go wrong and people with lead service lines would be exposed to lead in their drinking water.

Health Effects of Lead

It can cause damage to the brain and kidneys, and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones and can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development.

Sources of Lead

The source of water from Lake Michigan does not contain lead. When water is in contact with service lines or plumbing that contains lead for several hours, the lead may enter drinking water. Homes built before the 1960s in our community are more likely to have lead service lines and lead in solder and plumbing fixtures.

Don't forget, most lead exposure is still from small children ingesting lead paint, dust, and soil. In addition, lead can be found in certain types of pottery, pewter, brass fixtures, food, and cosmetics. Other sources include exposure in the work place and exposure from certain hobbies (lead can be carried on clothing or shoes). Lead is found in some toys, some playground equipment, and some children's metal jewelry. Wash your children's hands and toys often as they can come into contact with dirt and dust containing lead.

Steps That You Can Take to Reduce Your Exposure to Lead in Your Drinking Water

1. *Run your water to flush out lead.*
 - a. If the plumbing in your home is accessible; you may be able to inspect your own plumbing to

- determine whether you have a lead service line. Otherwise, you will most likely have to hire a plumber, or allow the Village to inspect your water line.
- b. If you do not have a lead service line, running the water for 1 - 2 minutes at the kitchen tap should clear the lead from your household plumbing to the kitchen tap. Once you have done this, fill a container with water and store it in the refrigerator for drinking, cooking, and preparing baby formula throughout the day.
 - c. If you do have a lead service line, flushing times can vary based on the length of your lead service line and the plumbing configuration in your home. The length of lead service lines varies considerably.
 - d. The following flushing guidelines are recommended by the American Water Works Association after a lead service line is replaced:
 - i. Find all the faucets that will drain, including the basement and all floors in your house.
 - ii. Remove aerators and screens whenever possible, including the shower heads, from all faucets you plan to flush.
 - iii. Include the laundry tubs, hose-bibs, bathtubs, and showers as flushing points.
 - iv. After all the aerators are off, open the faucets in the basement or lowest floor in the house. Leave all faucets running at highest rate possible, using cold water.
 - v. After the faucets are all open in lowest floor, open the faucets on next highest floor of the house. Continue until faucets are open on all floors.
 - vi. After all faucets are opened, leave the water running for at least 30 minutes.
 - vii. After 30 minutes, turn off the first faucet you opened and continue to turn off other faucets in the same order you turned them on.
 - viii. Clean aerators/screens at each faucet. You may need to replace screens/aerators if too old or worn
2. *Use cold water for drinking, cooking, and preparing baby formula.*
 - a. Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water.
 - b. Do not use water from the hot water tap to make baby formula.
 3. *Look for alternative sources or treatment of water.*
 - a. You may want to consider purchasing bottled water; or
 - b. Purchase a water filter that is certified to remove "total lead". The filter should be NSF 53 and NSF 42 certified.
 4. *Clean and remove any debris from faucet aerators on a regular basis.*
 5. *Do not boil water to remove lead.* Boiling water will not reduce lead.
 6. *Purchase lead free faucets and plumbing components.*
 7. *Remove the entire lead service line.*
 - a. *As part of the separate Lead Service Line Replacement program, should you agree to participate, the Village will replace your lead service line from the water main to the meter inside your home.*
 8. *Test your water for lead.*
 - a. Call us at: 815-412-2015 to find out how to get your water tested for lead. While we do not do the testing, we can provide a list of laboratories certified to do the testing. Laboratories will send you the bottles for sample collection. Please note that we are not affiliated with the laboratories, and they will charge you a fee.
 - If test results indicate a lead level above 15 ug/L, bottled water should be used by pregnant women, breast-feeding women, young children, and formula-fed infants.
 - b. Approximately one month after service line replacement, testing is recommended. The sample should be a first-draw sample after water has not been used for at least 6 hours. The sample must be collected from a tap used frequently inside the home, preferably from the kitchen.
 - c. As a precaution, until the sample is collected and analyzed, the customer is recommended to do a mini-flush of premise plumbing by running tap water each morning or when the water sits in the pipe for at least 6 hours. Flush for 5 minutes to displace water that has been sitting in the pipes inside the house and in the service line. This could include taking a shower, running the dishwasher, flushing a toilet, collecting water for plants/garden, or running the faucet. The customer should do this before using any

water for drinking, cooking, infant formula, and so on. Daily miniflushes should continue for six months or until lead sample results show the lead level is below the regulatory guideline. The customer should clean debris from aerators and screens once a month for six months. After six months, clean debris twice a year.

For More Information

Call us at () or visit our website at (). For more information on reducing lead exposure around your home/building and the health effects of lead, visit EPA's website at www.epa.gov/lead or contact your health care provider.

Thank you for reading this notice, and we hope to hear from you soon.
